

COVE STREET CAPITAL SMALL CAP VALUE FUND

Institutional Class – (CSCAX)

Statement of Additional Information

January 28, 2017

This Statement of Additional Information (“SAI”) provides general information about the Cove Street Capital Small Cap Value Fund (the “Fund”), a series of Managed Portfolio Series (the “Trust”). This SAI is not a prospectus and should be read in conjunction with the Fund’s current prospectus dated January 28, 2017 (the “Prospectus”), as supplemented and amended from time to time, which is incorporated herein by reference. In addition, the Fund’s financial statements for the fiscal year ended September 30, 2016 are incorporated herein by reference to the Fund’s annual report dated September 30, 2016. To obtain a copy of the Prospectus and/or annual report, free of charge, please write or call the Fund at the address or toll-free telephone number below, or visit the Fund’s website at www.covestreetfunds.com.

The Trust and the Fund

The Trust is a Delaware statutory trust organized on January 27, 2011, and is registered with the U.S. Securities and Exchange Commission (“SEC”) as an open-end management investment company. The Fund is one series, or mutual fund, of the Trust. The Fund has one class of shares: Institutional Class. The Fund is a diversified series and has its own investment objective and policies. Shares of other series of the Trust are offered in separate prospectuses and SAIs. The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor does it share the same investment adviser with any other series of the Trust. The Fund’s Prospectus and this SAI are a part of the Trust’s Registration Statement filed with the SEC. Copies of the Trust’s complete Registration Statement may be obtained from the SEC upon payment of the prescribed fee, or may be accessed free of charge at the SEC’s website at www.sec.gov. As permitted by Delaware law, the Trust’s Board of Trustees (the “Board”) may create additional classes of the Fund and may create additional series (and classes thereof) of the Trust and offer shares of these series and classes under the Trust at any time without the vote of shareholders.

Fund History. The RCB Small Cap Fund, a series of Professionally Managed Portfolios, commenced operations on September 30, 1998. Effective October 1, 2001, the assets of the RCB Small Cap Fund reorganized into Class R of the RCB Small Cap Value Fund, a series of CNI Charter Funds. On October 3, 2001, Class A and the Institutional Class of the RCB Small Cap Value Fund commenced operations. On October 17, 2007, Class A shares of the RCB Small Cap Value Fund were re-designated as Class N shares. Effective July 1, 2011, Jeffrey Bronchick, the portfolio manager for the RCB Small Cap Value Fund, left Reed Conner & Birdwell, LLC (“RCB”), the sub-adviser of the fund, as part of a voluntary realignment of the ownership of RCB, and organized Cove Street Capital, LLC (the “Adviser”), which commenced operations on July 1, 2011. Effective that day, CSC replaced RCB as the sub-adviser to the fund and the fund’s name changed to the CSC Small Cap Value Fund, still a series of CNI Charter Funds. On January 23, 2012, the CSC Small Cap Value Fund reorganized out of CNI Charter Funds into Managed Portfolio Series, as follows:

<u>CNI Charter Fund</u>		<u>Managed Portfolio Series Fund</u>
CSC Small Cap Value Fund – Institutional Class	reorganized into	CSC Small Cap Value Fund – Institutional Class
CSC Small Cap Value Fund – Class N	reorganized into	CSC Small Cap Value Fund – Investor Class, load waived
CSC Small Cap Value Fund – Class R	reorganized into	CSC Small Cap Value Fund – Investor Class

On November 25, 2015, the Fund converted Investor Class shares into Institutional Class shares.

All shares of a series shall represent an equal proportionate interest in the assets held with respect to that series (subject to the liabilities held with respect to that series and such rights and preferences as may have been established and designated with respect to classes of shares of such series), and each share of a series shall be equal to each other share of that series.

Shares are voted in the aggregate and not by series or class, except in matters where a separate vote is required by the Investment Company Act of 1940, as amended (the “1940 Act”), or when the matters affect only the interest of a particular series or class. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each full share owned and fractional votes for fractional shares owned.

The Trust does not normally hold annual meetings of shareholders. Meetings of the shareholders shall be called by any member of the Board upon written request of shareholders holding, in the aggregate, not less than 10% of the shares, such request specifying the purpose or purposes for which such meeting is to be called.

Interests in the Fund are represented by shares of beneficial interest, each with no par value per share. Each share of the Fund represents an equal proportionate interest in the assets and liabilities belonging to the Fund and is entitled to such distributions out of the income belonging to the Fund as may be declared by the Board.

The Board has the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series without materially changing the proportionate beneficial interest of the shares of that series in the assets belonging to that series or materially affecting the rights of shares of any other series. In case of the liquidation of a series, the holders of shares of the series being liquidated are entitled to receive a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series (or class thereof) are borne by that series (or class). Any general expenses of the Trust not readily identifiable as belonging to a particular series are allocated by, or under the direction of, the Board to all applicable series (and classes thereof) in such manner and on such basis as deemed fair and equitable. No shareholder is liable to further calls for the payment of any sum of money or assessment whatsoever with respect to the Trust or any series of the Trust without his or her express consent.

All consideration received by the Trust for the issue or sale of the Fund's shares, together with all assets in which such consideration is invested or reinvested, and all income, earnings, profits and proceeds thereof, including any proceeds derived from the sale, exchange or liquidation of such assets, and any funds or payments derived from any reinvestment of such proceeds, subject only to the rights of creditors, shall constitute the underlying assets of the Fund.

The Adviser serves as the investment adviser for the Fund.

The Fund commenced operations effective January 23, 2012, at which time the Fund acquired the assets and liabilities of a series of the CNI Charter Funds, a registered open-end investment management company (the "Predecessor Fund") for which the Adviser served as investment sub-adviser and which had similar investment objective, policies and strategies as the Fund.

Investment Policies, Strategies and Associated Risks

The following discussion supplements the description of the Fund's investment objective and principal investment strategies set forth in the Prospectus. Except for the fundamental investment limitations listed below (see "Fundamental and Non-Fundamental Investment Limitations"), the Fund's investment strategies and policies are not fundamental and may be changed by sole action of the Board, without shareholder approval. While the Fund is permitted to hold securities and engage in various strategies as described hereafter, it is not obligated to do so.

Investment Objective

The investment objective of the Fund is set forth under the "Summary Section" in the Fund's Prospectus.

Diversification

The Fund is diversified. A diversified fund is a fund that satisfies the definition of a "diversified company" set forth in the 1940 Act. A "diversified company" means that as to 75% of the Fund's

total assets (1) no more than 5% may be invested in the securities of a single issuer, and (2) the Fund may not hold more than 10% of the outstanding voting securities of a single issuer.

Because the Fund intends to qualify as a “regulated investment company” under Subchapter M of the Internal Revenue Code of 1986, as amended, (the “Code”), the Fund will limit its investment, excluding cash, cash items (including receivables), U.S. government securities and securities of other regulated investment companies, so that at the close of each quarter of the taxable year, (1) not more than 25% of the Fund’s total assets will be invested in the securities of a single issuer, and (2) with respect to 50% of its total assets, not more than 5% of the Fund’s total assets will be invested in the securities of a single issuer nor represent more than 10% of the issuer’s outstanding voting securities.

Because the Fund may invest a great percentage of its assets in the securities of fewer issuers, the Fund is subject to the risk that its performance may be hurt disproportionately by the poor performance of relatively few securities.

Percentage Limitations

The Fund’s compliance with its investment policy and limitation will be determined immediately after and as a result of the Fund’s acquisition of such security or other asset. Accordingly, except with respect to borrowing or illiquid securities, any subsequent change in values, net assets or other circumstances will not be considered when determining whether an investment complies with the Fund’s investment policies and limitations. In addition, if a bankruptcy or other extraordinary event occurs concerning a particular investment by the Fund, the Fund may receive stock, real estate or other investments that the Fund would not, or could not, buy. If this happens, the Fund will sell such investments as soon as practicable while trying to maximize the return to its shareholders.

Market Volatility

U.S. and international markets have from time to time experienced significant volatility. During certain volatile periods, the fixed income markets have experienced substantially lower valuations, reduced liquidity, price volatility, credit downgrades, increased likelihood of default and valuation difficulties. At times, concerns have spread to domestic and international equity markets. In some cases, the stock prices of individual companies have been negatively impacted even though there may be little or no apparent degradation in the financial conditions or prospects of that company. Continued volatility may have adverse effects on the Fund, and the risks discussed below and in the Prospectus may increase.

Equity Securities

An equity security represents a proportionate share of the ownership of a company. Its value is based on the success of the company’s business, any income paid to stockholders, the value of its assets and general market conditions. Common stocks and preferred stocks are examples of equity securities. The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease.

Common Stock

Common stock represents an ownership interest in a company. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which the Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to the Fund as holders of common stock. It is possible that all assets of that company will be exhausted before any payments are made to the Fund.

Preferred Stock

Preferred stock represents an ownership interest in a company, often pays dividends at a specific rate and has a preference over common stocks in dividend payments and liquidation of assets. A preferred stock is a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock its participation in the issuer's growth may be limited. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer. In addition, preferred stock usually does not have voting rights.

Foreign Investments and Currencies

The Fund may invest in securities of foreign issuers that are not traded in the United States and/or U.S. dollar denominated, purchase and sell foreign currency on a spot basis and enter into forward currency contracts (see "Forward Currency Contracts," below). The Fund may also invest in American Depositary Receipts ("ADRs") and foreign securities that are traded on a U.S. exchange. Investments in ADRs and foreign securities involve certain inherent risks, including the following:

Depository Receipts. Generally, ADRs, in registered form, are denominated in U.S. dollars and are designed for use in the U.S. securities markets. ADRs are receipts typically issued by a U.S. bank or trust company evidencing ownership of the underlying securities. ADRs may be purchased through "sponsored" or "unsponsored" facilities. A sponsored facility is established jointly by the issuer of the underlying security and a depository, whereas a depository may establish an unsponsored facility without participation by the issuer of the depository security. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of such receipts of the deposited securities. Accordingly, available information concerning the issuer may not be current and the prices of unsponsored depository receipts may be more volatile than the prices of sponsored depository receipts. For purposes of the Fund's investment policies, ADRs are deemed to have the same classification as the underlying securities they represent. Thus, an ADR representing ownership of common stock will be treated as common stock.

Political and Economic Factors. Individual foreign economies of certain countries may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross national product, rate of inflation, capital reinvestment, resource self-sufficiency, diversification and balance of payments position. The internal politics of certain foreign countries may not be as stable as those of the United States. Governments in certain foreign countries also continue to participate to a significant degree, through ownership interest or regulation, in their respective economies. Action by these governments could include restrictions on foreign investment, nationalization, expropriation of goods or imposition of taxes, and could have a significant effect on market prices of securities and payment of interest. The economies of many foreign countries are heavily dependent upon international trade and are accordingly affected by the trade policies and economic conditions of their trading partners. Enactment by these trading partners of protectionist trade legislation could have a significant adverse effect upon the securities markets of those countries.

Currency Fluctuations. The Fund may invest in securities denominated in foreign currencies. Accordingly, a change in the value of any such currency against the U.S. dollar will result in a corresponding change in the U.S. dollar value of the Fund's assets denominated in that currency. Such changes will also affect the Fund's income. The value of the Fund's assets may also be affected significantly by currency restrictions and exchange control regulations enacted from time to time.

Market Characteristics. The Adviser expects that many foreign securities in which the Fund may invest will be purchased in over-the-counter markets or on exchanges located in the countries in which the principal offices of the issuers of the various securities are located, if that is the best available market. Foreign exchanges and markets may be more volatile than those in the United States. While growing in volume, they usually have substantially less volume than U.S. markets, and the Fund's investments in foreign securities may be less liquid and more volatile than investments in U.S. securities. Moreover, settlement practices for transactions in foreign markets may differ from those in U.S. markets, and may include delays beyond periods customary in the United States. Foreign security trading practices, including those involving securities settlement where Fund assets may be released prior to receipt of payment or securities, may expose the Fund to increased risk in the event of a failed trade or the insolvency of a foreign broker-dealer.

Legal and Regulatory Matters. Certain foreign countries may have less supervision of securities markets, brokers and issuers of securities, non-uniform accounting standards and less financial information available from issuers, than is available in the United States. It may be more difficult to obtain and enforce a judgment against a foreign issuer. Legal remedies available to investors in certain foreign countries may be more limited than those available with respect to investments in the United States or in other foreign countries. The laws of some foreign countries may limit the Fund's ability to invest in securities of certain issuers located in those foreign countries. Foreign issuers may not be subject to auditing and financial reporting standards and requirements comparable to those which apply to U.S. companies.

Taxes. The interest and dividends payable on certain of the Fund's foreign portfolio securities may be subject to foreign withholding taxes, thus reducing the net amount of income available for distribution to Fund shareholders.

Costs. To the extent that the Fund invests in foreign securities, its expense ratio is likely to be higher than those of investment companies investing only in domestic securities, because related brokerage costs and the cost of maintaining the custody of foreign securities may be higher.

Additional Risks of Emerging Markets. In addition, the Fund may invest in foreign securities of companies that are located in developing or emerging markets. Investing in securities of issuers located in these markets may pose greater risks not typically associated with investing in more established markets, such as increased risk of social, political, and economic instability. Emerging market countries typically have smaller securities markets than developed countries and therefore less liquidity and greater price volatility than more developed markets. Securities traded in emerging markets may also be subject to risks associated with the lack of modern technology, poor infrastructures governing private or foreign investment or allowing for judicial redress for injury to private property, the lack of capital base to expand business operations, foreign taxation and the inexperience of financial intermediaries, custodians and transfer agents. Emerging market countries are also more likely to impose restrictions on the repatriation of an investor's assets and even where there is no outright restriction on repatriation, the mechanics of repatriations may delay or impede the Fund's ability to obtain possession of its assets. As a result, there may be an increased risk or price volatility associated with the Fund's investments in emerging market countries, which may be magnified by currency fluctuations.

Forward Currency Contracts

A forward currency contract ("forward contract") involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. A forward contract generally has no deposit requirement, and no commissions are charged at

any stage for trades. At or before settlement of a forward currency contract, the Fund may either deliver the currency or terminate its contractual obligation to deliver the currency by purchasing an offsetting contract. If the Fund makes delivery of the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency through the conversion of assets of the Fund into the currency. The Fund may close out a forward contract obligating it to purchase currency by selling an offsetting contract, in which case it will realize a gain or a loss.

The Fund enters into forward contracts in order to “lock in” the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, the Fund may enter into forward contracts to hedge against risks arising from securities the Fund owns or anticipates purchasing, or the U.S. dollar value of interest and dividends paid on those securities. The Fund does not intend to enter into forward contracts on a regular or continuing basis and the Fund will not enter these contracts for speculative purposes.

Foreign currency transactions involve certain costs and risks. The Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Adviser is inaccurate in its prediction of currency movements. The projection of short-term currency market movements is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for the Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and make delivery of the foreign currency. The use of forward contracts as a hedging technique does not eliminate fluctuations in the prices of the underlying securities the Fund owns or intends to acquire, but it does fix a rate of exchange in advance. Although forward contracts can reduce the risk of loss due to a decline in the value of the hedged currencies, they also limit any potential gain that might result from an increase in the value of the currencies. There is also the risk that the other party to the transaction may fail to deliver currency when due which may result in a loss to the Fund.

Real Estate Securities

The real estate securities in which the Fund may invest consist of securities issued by Real Estate Investment Trusts (“REITs”) and Real Estate Operating Companies (“REOCs”) that are listed on a securities exchange or traded over-the-counter. A REIT is a corporation or trust that invests in fee or leasehold ownership of real estate, or mortgages or shares issued by other REITs, and that receives favorable tax treatment provided it meets certain conditions. REITs may be characterized as equity REITs (i.e., REITs that primarily invest in fee ownership and leasehold ownership of land), mortgage REITs (i.e., REITs that primarily invest in mortgages on real estate and other real estate debt) or hybrid REITs which invest in both fee and leasehold ownership of land and mortgages. A REIT that meets the applicable requirements of the Internal Revenue Code of 1986 may deduct dividends paid to shareholders, effectively eliminating any corporate level federal tax. As a result, REITs are able to distribute a larger portion of their earnings to investors than other corporate entities subject to the federal corporate tax. There is the risk that a REIT held by the Fund will fail to qualify for this tax-free pass-through treatment of its income. By investing in REITs indirectly through the Fund, in addition to bearing a proportionate share of the expenses of the Fund, investors will also indirectly bear similar expenses of the REITs in which the Fund invests. A REOC is typically structured as a “C” corporation under the tax code and is not required to distribute any portion of its income. A REOC, therefore, does not receive the same favorable tax treatment that is accorded a REIT. In addition, the value of the Fund’s securities issued by REOCs may be adversely affected by income streams derived from businesses other than real estate ownership.

Fixed-Income Securities

The Fund may invest in a wide range of fixed-income securities, which may include obligations of any rating or maturity. The Fund may invest in investment grade debt securities and below investment grade debt securities (commonly known as “junk bonds” or “high yield bonds”). Investment grade debt securities are those rated BBB- or better by Standard & Poor’s Rating Service, Inc. (“S&P”) or Baa3 or better by Moody’s Investors Service, Inc. (“Moody’s”), each of which are considered a nationally recognized statistical rating organization (“NRSRO”), or an equivalent rating by another NRSRO. The Fund will not invest in securities that are rated below D by S&P or Moody’s. The Fund may hold a debt security rated below D if a downgrade occurs after the security has been purchased. The Fund may also invest in unrated debt securities that the Adviser believes are of comparable quality to the rated securities which the Fund may purchase.

Debt securities carry credit risk, interest rate risk, prepayment risk, duration risk, and liquidity risk. Credit risk is the risk that the Fund could lose money if the issuer of a debt security defaults or fails to pay interest or principal when it is due. Some debt securities that are rated below investment grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer’s debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities.

Interest rate risk is the risk that the value of certain debt securities will tend to fall when interest rates rise. In general, debt securities with longer terms tend to fall more in value when interest rates rise than debt securities with shorter terms. Holding long duration and long maturity investments will magnify certain risks, including interest rate risk and credit risk. Prepayment risk occurs when issuers prepay fixed rate debt securities when interest rates fall, forcing the Fund to invest in securities with lower interest rates. If the Fund reinvests the proceeds of matured or sold securities at market interest rates that are below its portfolio earnings rate, its income will decline.

The Fund may be exposed to liquidity risk when trading volume, lack of a market maker, or legal restrictions impair the Fund’s ability to sell particular securities at an advantageous price or a timely manner. In addition, it may be more difficult for the Fund to buy and sell significant amounts of such securities without an unfavorable impact on prevailing market prices. As a result, these securities may be difficult to sell at a favorable price at the times when the Adviser believes it is desirable to do so. Investment in securities that are less actively traded (or over time experience decreased trading volume) may restrict the Fund’s ability to take advantage of other market opportunities.

Issuers of debt securities are also subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on its debt securities. The possibility exists therefore, that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

Junk Bonds. Junk bonds generally offer a higher current yield than that available for investment grade issues. However, below investment grade debt securities involve higher risks, in that they are especially subject to adverse changes in general economic conditions and in the industries in which the issuers are engaged, to changes in the financial condition of the issuers, and to price fluctuations in response to changes in interest rates. During periods of economic downturn or rising interest rates,

highly leveraged issuers may experience financial stress that could adversely affect their ability to make payments of interest and principal and increase the possibility of default. At times in recent years, the prices of many below investment grade debt securities declined substantially, reflecting an expectation that many issuers of such securities might experience financial difficulties. As a result, the yields on below investment grade debt securities rose dramatically, reflecting the risk that holders of such securities could lose a substantial portion of their value as a result of the issuers' financial restructuring or default. There can be no assurance that such price declines will not recur. The market for below investment grade debt issues generally is thinner and less active than that for higher quality securities, which may limit the Fund's ability to sell such securities at fair value in response to changes in the economy or financial markets. Adverse publicity and investor perceptions, whether based on fundamental analysis, may also decrease the values and liquidity of below investment grade debt securities, especially in a thinly traded market. Changes in the rating of a debt security by recognized rating services may affect the value of these investments. The Fund will not necessarily dispose of a security when its rating is reduced below its rating at the time of purchase. However, the Adviser will monitor the investment to determine whether continued investment in the security will assist in meeting the Fund's investment objective.

Variable and Floating Rate Securities. Variable and floating rate securities provide for a periodic adjustment in the interest rate paid on the obligations. The terms of such obligations must provide that interest rates are adjusted periodically based upon an interest rate adjustment index as provided in the respective obligations. The adjustment intervals may be regular, and range from daily up to annually, or may be event-based, such as a change in the prime rate.

Corporate Debt Securities. Corporate debt securities are fixed-income securities issued by businesses to finance their operations, although corporate debt instruments may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities, with the primary difference being their maturities and secured or unsecured status. Commercial paper has the shortest term and is usually unsecured.

The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment grade or below investment grade and may carry fixed, variable, or floating rates of interest.

Because of the wide range of types and maturities of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Exchange-Traded Notes. The Fund may invest in exchange-traded notes ("ETNs"). An ETN is a type of unsecured, unsubordinated debt security that differs from other types of bonds and notes because ETN returns are typically based upon the performance of a market index. ETNs are publicly traded on a U.S. securities exchange. An ETN incurs certain expenses not incurred by its applicable index, and an investment in an ETN will bear its proportionate share of any fees and expenses borne by the ETN. The market value of an ETN share may differ from its NAV; the share may trade at a premium or discount to its NAV, which may be due to, among other things, differences in the supply and demand in the market for the share. Although an ETN is a debt security, it is unlike a typical bond, in that there are no periodic interest payments and principal is not protected. ETNs are subject

to credit risk and the value of the ETN may drop due to a downgrade in the issuer's credit rating, despite the underlying market benchmark or strategy remaining unchanged.

Convertible Securities. Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock or other equity security at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. The investment characteristics of convertible securities vary widely, which allows them to be employed for a variety of investment strategies. The Fund will exchange or convert convertible securities into shares of underlying common stock when, in the opinion of the Adviser, the investment characteristics of the underlying common stock or other equity security will assist the Fund in achieving its investment objectives. The Fund may also elect to hold or trade convertible securities. In selecting convertible securities, the Adviser evaluates the investment characteristics of the convertible security as a fixed income instrument, and the investment potential of the underlying equity security for capital appreciation.

Contingent Convertible Securities. Contingent convertible securities ("CoCos") are a form of hybrid debt security that are intended to either convert into equity or have their principal written down upon the occurrence of certain "triggers." The triggers are generally linked to regulatory capital thresholds or regulatory actions calling into question the issuing banking institution's continued viability as a going concern. CoCos' unique equity conversion or principal write-down features are tailored to the issuing banking institution and its regulatory requirements. Some additional risks associated with CoCos include, but are not limited to:

- Loss absorption risk. CoCos have fully discretionary coupons. This means coupons can potentially be cancelled at the banking institution's discretion or at the request of the relevant regulatory authority in order to help the bank absorb losses.
- Subordinated instruments. CoCos will, in the majority of circumstances, be issued in the form of subordinated debt instruments in order to provide the appropriate regulatory capital treatment prior to a conversion. Accordingly, in the event of liquidation, dissolution or winding-up of an issuer prior to a conversion having occurred, the rights and claims of the holders of the CoCos, such as the Fund, against the issuer in respect of or arising under the terms of the CoCos shall generally rank junior to the claims of all holders of unsubordinated obligations of the issuer. In addition, if the CoCos are converted into the issuer's underlying equity securities following a conversion event (i.e., a "trigger"), each holder will be subordinated due to their conversion from being the holder of a debt instrument to being the holder of an equity instrument.
- Market value will fluctuate based on unpredictable factors. The value of CoCos is unpredictable and will be influenced by many factors including, without limitation: (i) the creditworthiness of the issuer and/or fluctuations in such issuer's applicable capital ratios; (ii) supply and demand for the CoCos; (iii) general market conditions and available liquidity; and (iv) economic, financial and political events that affect the issuer, its particular market or the financial markets in general.

Asset-Backed Securities. Asset-backed securities represent an interest in a pool of assets such as car loans and credit card receivables. Almost any type of fixed income assets (including other fixed income securities) may be used to create an asset-backed security. However, most asset-backed securities involve consumer or commercial debts with maturities of less than ten years. Asset-backed securities may have a higher level of default and lower recoveries than mortgage-backed securities.

Asset-backed securities may take the form of commercial paper or notes, in addition to pass-through certificates or asset-backed bonds.

Mortgage-Backed Securities. Mortgage-backed securities represent interests in pools of mortgages on residential or commercial property. Mortgages may have fixed or adjustable interest rates. Interests in pools of adjustable rate mortgages are known as ARMs. Mortgage-backed securities come in a variety of forms. Many have extremely complicated terms. The simplest form of mortgage-backed securities is a “pass-through certificate.” Holders of pass-through certificates receive a pro rata share of the payments from the underlying mortgages. Holders also receive a pro rata share of any prepayments, so they assume all the prepayment risk of the underlying mortgages. Mortgage-backed securities tend to pay higher yields to compensate for prepayment risk.

Collateralized mortgage obligations (“CMOs”) are complicated instruments that allocate payments and prepayments from an underlying pass-through certificate among holders of different classes of mortgage-backed securities. This creates different prepayment and market risks for each CMO class. In addition, CMOs may allocate interest payments to one class (Interest Only or IOs) and principal payments to another class (Principal Only or POs). POs increase in value when prepayment rates increase. In contrast, IOs decrease in value when prepayments increase, because the underlying mortgages generate less interest payments. However, IOs’ prices tend to increase when interest rates rise (and prepayments fall), making IOs a useful hedge against market risk.

Residential mortgage-backed securities include securities that reflect an interest in, and are secured by, mortgage loans on residential real property. Generally, homeowners have the option to prepay their mortgages at any time without penalty. Homeowners frequently refinance high rate mortgages when mortgage rates fall. This results in the prepayment of the mortgages underlying residential mortgage-backed securities, which deprives holders of the securities of the higher yields. Conversely, when mortgage rates increase, prepayments due to refinancings decline. This extends the life of residential mortgage-backed securities with lower yields. As a result, increases in prepayments of residential mortgage-backed securities purchased at a premium, or decreases in prepayments of residential mortgage-backed securities purchased at a discount, may reduce their yield and price. This relationship between interest rates and mortgage prepayments makes the price of residential mortgage-backed securities more volatile than most other types of fixed income securities with comparable credit risks.

Commercial mortgage-backed securities include securities that reflect an interest in, and are secured by, mortgage loans on commercial real property. In addition to prepayment and extension risk, commercial mortgage-backed securities also reflect the risks of investing in the real estate securing the underlying mortgage loans including, the effects of local and other economic conditions on real estate markets, the ability of the property owner to make loan payments, the ability of tenants to make lease payments, and the ability of a property to attract and retain tenants. Commercial mortgage-backed securities may be less liquid and exhibit greater price volatility than other types of mortgage- or asset-backed securities.

Municipal Securities. Municipal securities are fixed income securities issued by states, counties, cities and other political subdivisions and authorities. Although most municipal securities are exempt from federal income tax, municipalities also may issue taxable securities. Tax-exempt securities are generally classified by their source of payment.

Zero-Coupon Securities. Zero-coupon securities make no periodic interest payments, but are sold at a deep discount from their face value. The buyer recognizes a rate of return determined by the gradual appreciation of the security, which is redeemed at face value on a specified maturity date. The

discount varies depending on the time remaining until maturity, as well as market interest rates, liquidity of the security, and the issuer's perceived credit quality. If the issuer defaults, the holder may not receive any return on its investment. Because zero-coupon securities bear no interest, their price fluctuates more than other types of bonds. Since zero-coupon bondholders do not receive interest payments, when interest rates rise, zero-coupon securities fall more dramatically in value than bonds paying interest on a current basis. When interest rates fall, zero-coupon securities rise more rapidly in value because the bonds reflect a fixed rate of return. An investment in zero-coupon may cause the Fund to recognize income and make distributions to shareholders before it receives any cash payments on its investment.

Unrated Debt Securities. The Fund may also invest in unrated debt securities. Unrated debt, while not necessarily lower in quality than rated securities, may not have as broad a market. Because of the size and perceived demand for the issue, among other factors, certain issuers may decide not to pay the cost of getting a rating for their bonds. The creditworthiness of the issuer, as well as any financial institution or other party responsible for payments on the security, will be analyzed to determine whether to purchase unrated bonds.

Inflation-Indexed Securities. Inflation-indexed securities are debt securities, the principal value of which is periodically adjusted to reflect the rate of inflation as indicated by the Consumer Price Index for all Urban Consumers before seasonal adjustment ("CPI"). Inflation-indexed securities may be issued by the U.S. government, agencies and instrumentalities of the U.S. government, and by corporations. The U.S. Treasury issues Treasury inflation-protected securities ("TIPS") and some other issuers use a structure that accrues inflation into the principal value of the bond. Most other issuers pay out the CPI accruals as part of a semiannual coupon.

The periodic adjustment of U.S. inflation-indexed securities is tied to the CPI, which is calculated monthly by the U.S. Bureau of Labor Statistics. The CPI is a measurement of changes in the cost of living, made up of components such as housing, food, transportation, and energy. There can be no assurance that the CPI will accurately measure the real rate of inflation in the prices of goods and services.

Inflation, which is a general rise in prices of goods and services, erodes the purchasing power of an investor's portfolio. For example, if an investment provides a "nominal" total return of 5% in a given year and inflation is 2% during that period, the inflation-adjusted, or real, return is 3%. Inflation, as measured by the CPI, has occurred in almost each of the past 50 years, so investors should be conscious of both the nominal and real returns of their investments. Although inflation-indexed securities are expected to be protected from long-term inflationary trends, short-term increases in inflation may lead to a decline in value. If interest rates rise because of reasons other than inflation (for example, because of changes in currency exchange rates), investors in these securities may not be protected to the extent that the increase is not reflected in the bond's inflation measure.

If the periodic adjustment rate measuring inflation (i.e., the CPI) falls, the principal value of inflation-indexed securities will be adjusted downward, and consequently the interest payable on these securities (calculated with respect to a smaller principal amount) will be reduced. Repayment of the original bond principal upon maturity (as adjusted for inflation) is guaranteed in the case of TIPS, even during a period of deflation. However, the current market value of the inflation-indexed securities is not guaranteed, and will fluctuate. Other inflation-indexed securities include inflation-related bonds, which may or may not provide a similar guarantee. If a guarantee of principal is not provided, the adjusted principal value of the bond repaid at maturity may be less than the original principal.

The value of inflation-indexed securities should change in response to changes in real interest rates. Real interest rates, in turn, are tied to the relationship between nominal interest rates and the rate of inflation. Therefore, if inflation were to rise at a faster rate than nominal interest rates, real interest rates might decline, leading to an increase in value of inflation-indexed securities. In contrast, if nominal interest rates increased at a faster rate than inflation, real interest rates might rise, leading to a decrease in value of inflation-indexed securities.

Coupon payments that the Fund receives from inflation-indexed securities are included in the Fund's gross income for the period during which they accrue. Any increase in principal for an inflation-indexed security resulting from inflation adjustments is considered by Internal Revenue Service (IRS) regulations to be taxable income in the year it occurs. For direct holders of an inflation-indexed security, this means that taxes must be paid on principal adjustments, even though these amounts are not received until the bond matures. By contrast, a fund holding these securities distributes both interest income and the income attributable to principal adjustments each quarter in the form of cash or reinvested shares (which, like principal adjustments, are taxable to shareholders). It may be necessary for the Fund to liquidate portfolio positions, including when it is not advantageous to do so, in order to make required distributions.

Participation Notes. The Fund may purchase participation notes, also known as participation certificates. Participation notes are issued by banks or broker-dealers and are designed to replicate the performance of foreign companies or foreign securities markets and can be used by the Fund as an alternative means to access the securities market of a country. The performance results of participation notes will not replicate exactly the performance of the foreign companies or foreign securities markets that they seek to replicate due to transaction costs and other expenses. Investments in participation notes involve the same risks associated with a direct investment in the underlying foreign companies or foreign securities markets that they seek to replicate. There can be no assurance that the trading price of participation notes will equal the underlying value of the foreign companies or foreign securities markets that they seek to replicate. Participation notes are generally traded over-the-counter. Participation notes are subject to counterparty risk, which is the risk that the broker-dealer or bank that issues them will not fulfill its contractual obligation to complete the transaction with the Fund. Participation notes constitute general unsecured contractual obligations of the banks or broker-dealers that issue them, the counterparty, and the Fund is relying on the creditworthiness of such counterparty and has no rights under a participation note against the issuer of the underlying security. Participation notes involve transaction costs. Participation notes may be illiquid and therefore subject to the Fund's percentage limitation for investments in illiquid securities. Participation notes offer a return linked to a particular underlying equity, debt or currency.

U.S. Government Obligations

The Fund may invest in U.S. government obligations. U.S. government obligations include securities issued or guaranteed as to principal and interest by the U.S. government, its agencies or instrumentalities. Treasury bills, the most frequently issued marketable government securities, have a maturity of up to one year and are issued on a discount basis. U.S. government obligations include securities issued or guaranteed by government-sponsored enterprises.

Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. In the latter case, the investor must look principally to the agency or instrumentality issuing or guaranteeing the obligation for ultimate repayment, which agency or instrumentality may be privately owned. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities, including government-sponsored enterprises, where it is not obligated to do so (see "Agency Obligations," below). In addition, U.S.

government obligations are subject to fluctuations in market value due to fluctuations in market interest rates. As a general matter, the value of debt instruments, including U.S. government obligations, declines when market interest rates increase and rises when market interest rates decrease. Certain types of U.S. government obligations are subject to fluctuations in yield or value due to their structure or contract terms.

Agency Obligations

The Fund may invest in agency obligations, such as the Export-Import Bank of the United States, Tennessee Valley Authority, Resolution Funding Corporation, Farmers Home Administration, Federal Home Loan Banks, Federal Intermediate Credit Banks, Federal Farm Credit Banks, Federal Land Banks, Federal Housing Administration, Government National Mortgage Association (“GNMA”), commonly known as “Ginnie Mae,” Federal National Mortgage Association (“FNMA”), commonly known as “Fannie Mae,” Federal Home Loan Mortgage Corporation (“FHLMC”), commonly known as “Freddie Mac,” and the Student Loan Marketing Association (“SLMA”), commonly known as “Sallie Mae.” Some, such as those of the Export-Import Bank of United States, are supported only by the right of the issuer to borrow from the Treasury; others, such as those of the FNMA and FHLMC, are supported by only the discretionary authority of the U.S. government to purchase the agency’s obligations; still others, such as those of the SLMA, are supported only by the credit of the instrumentality. No assurance can be given that the U.S. government would provide financial support to U.S. government-sponsored instrumentalities because they are not obligated by law to do so. As a result, there is a risk that these entities will default on a financial obligation. For instance, in September 2008, at the direction of the U.S. Treasury, FNMA and FHLMC were placed into conservatorship under the Federal Housing Finance Agency (“FHFA”), a newly created independent regulator.

Options, Futures and Other Strategies

General. The Fund may use options (both traded on an exchange and OTC), futures contracts (sometimes referred to as “futures”), swaps, caps, floors, collars, structured or synthetic financial instruments, forward agreements, and other derivative securities (collectively, “Financial Instruments”) as a substitute for a comparable market position in the underlying security, to attempt to hedge or limit the exposure of a particular portfolio security, to create a synthetic position, for certain tax-related purposes, to close out previously established derivatives such as options, forward and futures positions, to reduce volatility, to enhance income, and/or to gain market exposure. These can also be used as speculative instruments. In addition to the other limitations described herein, the Fund’s ability to use Financial Instruments may be limited by tax considerations.

In addition to the instruments, strategies and risks described below, the Adviser may discover additional opportunities in connection with Financial Instruments and other similar or related techniques. These new opportunities may become available as the Adviser develops new investment techniques, as regulatory authorities broaden the range of permitted transactions and as new Financial Instruments or other techniques are developed. The Adviser may utilize these opportunities to the extent that they are consistent with the Fund’s investment objective and permitted by the Fund’s investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below.

Exclusion of Adviser from Commodity Pool Operator Definition. An exclusion from the definition of “commodity pool operator” (“CPO”) under the Commodity Exchange Act (“CEA”) and the rules of the CFTC has been claimed with respect to the Fund, and, therefore, the Adviser is not subject to CFTC registration or regulation as a CPO with respect to the Fund. In addition, the Adviser is relying

upon a related exemption from the definition of “commodity trading advisor” (“CTA”) under the CEA and the rules of the CFTC.

The terms of the CPO exclusion require the Fund, among other things, to adhere to certain limits on its investments in “commodity interests.” Commodity interests include commodity futures, commodity options and swaps, which in turn include non-deliverable currency forward contracts, as further described below. Because the Adviser and the Fund intend to comply with the terms of the CPO exclusion, the Fund may, in the future, need to adjust its investment strategies, consistent with its investment goal, to limit its investments in these types of instruments. The Fund is not intended as a vehicle for trading in the commodity futures, commodity options or swaps markets. The CFTC has neither reviewed nor approved the Fund’s and the Adviser’s reliance on this exclusion and exemption, respectively, or the Fund, its investment strategies or this SAI.

Generally, the exclusion from CPO regulation requires the Fund to meet one of the following tests for its commodity interest positions, other than positions entered into for bona fide hedging purposes (as defined in the rules of the CFTC): either (1) the aggregate initial margin and premiums required to establish the Fund’s positions in commodity interests may not exceed 5% of the liquidation value of the Fund’s portfolio (after taking into account unrealized profits and unrealized losses on any such positions); or (2) the aggregate net notional value of the Fund’s commodity interest positions, determined at the time the most recent such position was established, may not exceed 100% of the liquidation value of the Fund’s portfolio (after taking into account unrealized profits and unrealized losses on any such positions). In addition to meeting one of these trading limitations, the Fund may not be marketed as a commodity pool or otherwise as a vehicle for trading in the commodity futures, commodity options or swaps markets. If, in the future, the Fund can no longer satisfy these requirements, the notice claiming an exclusion from the definition of a CPO would be withdrawn, and the Adviser would be subject to registration and regulation as a CPO with respect to the Fund, in accordance with CFTC rules that apply to CPOs of registered investment companies. Generally, these rules allow for substituted compliance with CFTC disclosure and shareholder reporting requirements, based on the Adviser’s compliance with comparable SEC requirements. However, as a result of CFTC regulation with respect to the Fund, the Fund may incur additional compliance and other expenses.

Special Risks. The use of Financial Instruments involves special considerations and risks, certain of which are described below. Risks pertaining to particular Financial Instruments are described in the sections that follow.

(1) Successful use of most Financial Instruments depends upon the Adviser’s ability to predict movements of the overall securities markets, which requires different skills than predicting changes in the prices of individual securities. The ordinary spreads between prices in the cash and futures markets, due to the differences in the natures of those markets, are subject to distortion. Due to the possibility of distortion, a correct forecast of market trends by the Adviser may still not result in a successful transaction. The Adviser may be incorrect in its expectations as to the extent of market movements or the time span within which the movements take place, which, thus, may result in the strategy being unsuccessful.

(2) Certain Financial Instruments may have a leveraging effect on the Fund, and adverse changes in the value of the underlying security, index, interest rate, currency or other or measure can result in losses substantially greater than the amount invested in the Financial Instrument itself. When the Fund engages in transactions that have a leveraging effect, the value of the Fund is likely to be more volatile and all other risks are also likely to be compounded. This is because leverage generally magnifies the effect of any increase or decrease in the value of an asset and creates investment risk

with respect to a larger pool of assets than the Fund would otherwise have. Certain Financial Instruments have the potential for unlimited loss, regardless of the size of the initial investment.

(3) Certain Financial Instrument transactions, including certain options, swaps, forward contracts, and certain options on foreign currencies, are entered into directly by the counterparties and/or through financial institutions acting as market makers (“OTC derivatives”), rather than being traded on exchanges or in markets registered with the CFTC or the SEC. Many of the protections afforded to exchange participants will not be available to participants in OTC derivatives transactions. For example, OTC derivatives transactions are not subject to the guarantee of an exchange, and only OTC derivatives that are either required to be cleared or submitted voluntarily for clearing to a clearinghouse will enjoy the protections that central clearing provides against default by the original counterparty to the trade. In an OTC derivatives transaction that is not cleared, the Fund bears the risk of default by its counterparty. In a cleared derivatives transaction, the Fund is instead exposed to the risk of default of the clearinghouse and the risk of default of the broker through which it has entered into the transaction. Information available on counterparty creditworthiness may be incomplete or outdated, thus reducing the ability to anticipate counterparty defaults.

(4) Options and futures prices can diverge from the prices of their underlying instruments. Options and futures prices are affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract, which may not affect security prices the same way. Imperfect or no correlation also may result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, and from the imposition of daily price fluctuation limits or trading halts.

(5) As described below, the Fund might be required to maintain assets as “cover,” maintain segregated accounts or make margin payments when it takes positions in Financial Instruments involving obligations to third parties (e.g., Financial Instruments other than purchased options). If the Fund is unable to close out its positions in such Financial Instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expired or matured. These requirements might impair the Fund’s ability to sell a portfolio security or make an investment when it would otherwise be favorable to do so or require that the Fund sells a portfolio security at a disadvantageous time. The Fund’s ability to close out a position in a Financial Instrument prior to expiration or maturity depends on the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the other party to the transaction (the “counter-party”) to enter into a transaction closing out the position. Therefore, there is no assurance that any position can be closed out at a time and price that is favorable to the Fund.

(6) Losses may arise due to unanticipated market price movements, lack of a liquid secondary market for any particular instrument at a particular time or due to losses from premiums paid by the Fund on options transactions.

Cover. Transactions using Financial Instruments, other than purchasing options, expose the Fund to an obligation to another party. The Fund will not enter into any such transactions unless it owns either (1) an offsetting (“covered”) position in securities or other options or futures contracts or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. The Fund will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with its custodian, U.S. Bank, N.A. (the “Custodian”), in the prescribed amount as determined daily.

Assets used as cover or held in an account cannot be sold while the position in the corresponding Financial Instrument is open, unless they are replaced with other appropriate assets. As a result, the commitment of a large portion of the Fund's assets to cover obligations under Financial Instruments could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

Options. The value of an option position will reflect, among other things, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment and general market conditions. Options that expire unexercised have no value. Options currently are traded on the Chicago Board Options Exchange ("CBOE"), the American Stock and Options Exchange ("AMEX") and other exchanges, as well as the OTC markets.

By buying a call option on a security, the Fund has the right, in return for the premium paid, to buy the security underlying the option at the exercise price. By writing (selling) a call option and receiving a premium, the Fund becomes obligated during the term of the option to deliver securities underlying the option at the exercise price if the option is exercised. The Fund will only write call options on securities it holds in its portfolio (i.e., covered calls). By buying a put option, the Fund has the right, in return for the premium, to sell the security underlying the option at the exercise price. By writing a put option and receiving a premium, the Fund becomes obligated during the term of the option to purchase the securities underlying the option at the exercise price.

Because options premiums paid or received by the Fund are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities.

The Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, the Fund may terminate an obligation under a call option or put option that it has written by purchasing an identical call option or put option. This is known as a closing purchase transaction. Conversely, the Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option. This is known as a closing sale transaction. Closing transactions permit the Fund to realize profits or limit losses on an option position prior to its exercise or expiration.

Interest Rate Options. Interest rate options, including interest rate caps and interest rate floors, which can be combined to form interest rate collars, are contracts that entitle the purchaser to pay or receive the amounts, if any, by which a specified market rate exceeds a cap strike interest rate, or falls below a floor strike interest rate, respectively, at specified dates. The Fund may use interest rate options to hedge against anticipated and non-anticipated changes in interest rates on a portfolio wide basis or versus individual securities which may also have interest rate options embedded within the security.

OTC Options. Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. While this type of arrangement allows the Fund great flexibility to tailor the option to its needs, OTC options generally involve greater risk than exchange-traded options, which are guaranteed by the clearing organization of the exchanges where they are traded.

Interest Rate Futures Contracts and Options on Interest Rate Futures Contracts. Bond prices are established in both the cash market and the futures market. In the cash market, bonds are purchased and sold with payment for the full purchase price of the bond being made in cash, generally within

five business days after the trade. In the futures market, a contract is made to purchase or sell a bond in the future for a set price on a certain date. Historically, the prices for bonds established in the futures markets have tended to move generally in the aggregate in concert with the cash market prices and have maintained fairly predictable relationships. Accordingly, the Fund may use interest rate futures contracts as a defense, or hedge, against anticipated interest rate changes. The Fund presently could accomplish a similar result to that which it hopes to achieve through the use of interest rate futures contracts by selling bonds with long maturities and investing in bonds with short maturities when interest rates are expected to increase, or conversely, selling bonds with short maturities and investing in bonds with long maturities when interest rates are expected to decline. However, because of the liquidity that is often available in the futures market, the protection is more likely to be achieved, perhaps at a lower cost and without changing the rate of interest being earned by the Fund, through using futures contracts.

Interest rate futures contracts are traded in an auction environment on the floors of several exchanges and must be executed through a futures commission merchant (“FCM”), which is a brokerage firm that is a member of the relevant contract market. Each exchange guarantees performance under contract provisions through a clearing corporation, a nonprofit organization managed by the exchange membership. A public market exists in futures contracts covering various financial instruments including long-term U.S. Treasury Bonds and Notes; GNMA modified pass-through mortgage backed securities; three-month U.S. Treasury Bills; and ninety-day commercial paper. The Fund may also invest in exchange-traded Eurodollar contracts, which are interest rate futures on the forward level of LIBOR. These contracts are generally considered liquid securities and trade on the Chicago Mercantile Exchange. Such Eurodollar contracts are generally used to “lock-in” or hedge the future level of short-term rates. The Fund may trade in any interest rate futures contracts for which there exists a public market, including, without limitation, the foregoing instruments.

Futures Contracts and Options on Futures Contracts. A futures contract obligates the seller to deliver (and the purchaser to take delivery of) the specified security on the expiration date of the contract. An index futures contract obligates the seller to deliver (and the purchaser to take) an amount of cash equal to a specific dollar amount times the difference between the value of a specific index at the close of the last trading day of the contract and the price at which the agreement is made. No physical delivery of the underlying securities in the index is made.

When the Fund writes an option on a futures contract, it becomes obligated, in return for the premium received, to assume a position in the futures contract at a specified exercise price at any time during the term of the option. If the Fund writes a call, it assumes a short futures position. If the Fund writes a put, it assumes a long futures position. When the Fund purchases an option on a futures contract, it acquires the right in return for the premium it pays to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put).

Whether the Fund realizes a gain or loss from futures activities depends upon movements in the underlying security or index. The extent of the Fund’s loss from an unhedged short position in futures contracts or from writing unhedged call options on futures contracts is potentially unlimited. The Fund only purchase and sell futures contracts and options on futures contracts that are traded on a U.S. exchange or board of trade.

No price is paid upon entering into a futures contract. Instead, at the inception of a futures contract the Fund is required to deposit “initial margin” in an amount generally equal to 10% or less of the contract value. Margin also must be deposited when writing a call or put option on a futures contract, in accordance with applicable exchange rules. Unlike margin in securities transactions, initial margin does not represent a borrowing, but rather is in the nature of a performance bond or good-faith deposit

that is returned to the Fund at the termination of the transaction if all contractual obligations have been satisfied. Under certain circumstances, such as periods of high volatility, the Fund may be required by an exchange to increase the level of its initial margin payment, and initial margin requirements might be increased generally in the future by regulatory action.

Subsequent “variation margin” payments are made to and from the futures commission merchant daily as the value of the futures position varies, a process known as “marking-to-market.” Variation margin does not involve borrowing, but rather represents a daily settlement of the Fund’s obligations to or from a futures commission merchant. When the Fund purchases an option on a futures contract, the premium paid plus transaction costs is all that is at risk. In contrast, when the Fund purchases or sell a futures contract or writes a call or put option thereon, it is subject to daily variation margin calls that could be substantial in the event of adverse price movements. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

Purchasers and sellers of futures contracts and options on futures can enter into offsetting closing transactions, similar to closing transactions in options, by selling or purchasing, respectively, an instrument identical to the instrument purchased or sold. Positions in futures and options on futures contracts may be closed only on an exchange or board of trade that provides a secondary market. However, there can be no assurance that a liquid secondary market will exist for a particular contract at a particular time. In such event, it may not be possible to close a futures contract or options position.

Under certain circumstances, futures exchanges may establish daily limits on the amount that the price of a futures contract or an option on a futures contract can vary from the previous day’s settlement price. Once that limit is reached, no trades may be made that day at a price beyond the limit. Daily price limits do not limit potential losses because prices could move to the daily limit for several consecutive days with little or no trading, thereby preventing liquidation of unfavorable positions.

If the Fund were unable to liquidate a futures contract or an option on a futures position due to the absence of a liquid secondary market or the imposition of price limits, it could incur substantial losses. The Fund would continue to be subject to market risk with respect to the position. In addition, except in the case of purchased options, the Fund would continue to be required to make daily variation margin payments and might be required to maintain cash or liquid assets in an account.

Risks of Futures Contracts and Options Thereon. The ordinary spreads between prices in the cash and futures markets (including the options on futures markets), due to differences in the natures of those markets, are subject to the following factors, which may create distortions. First, all participants in the futures market are subject to margin deposit and maintenance requirements. Rather than meeting additional margin deposit requirements, investors may close futures contracts through offsetting transactions, which could distort the normal relationships between the cash and futures markets. Second, the liquidity of the futures market depends on participants entering into offsetting transactions rather than making or taking delivery. To the extent participants decide to make or take delivery, liquidity in the futures market could be reduced, thus producing distortion. Third, from the point of view of speculators, the deposit requirements in the futures market are less onerous than margin requirements in the securities market. Therefore, increased participation by speculators in the futures market may cause temporary price distortions.

Combined Positions. The Fund may purchase and write options in combination with each other. For example, the Fund may purchase a put option and write a call option on the same underlying

instrument in order to construct a combined position whose risk and return characteristics are similar to selling a futures contract. Another possible combined position would involve writing a call option at one strike price and buying a call option at a lower price, in order to reduce the risk of the written call option in the event of a substantial price increase. Because combined options positions involve multiple trades, they result in higher transaction costs and may be more difficult to open and close out.

Swaps Generally. Generally, swap agreements are contracts between the Fund and another party (the swap counterparty) involving the exchange of payments on specified terms over periods ranging from a few days to multiple years. A swap agreement may be negotiated bilaterally and traded OTC between the two parties (for an uncleared swap) or, in some instances, must be transacted through an FCM and cleared through a clearinghouse that serves as a central counterparty (for a cleared swap). The notional amount is the set dollar or other value selected by the parties to use as the basis on which to calculate the obligations that the parties to a swap agreement have agreed to exchange. The parties typically do not actually exchange the notional amount. Instead they agree to exchange the returns that would be earned or realized if the notional amount were invested in given investments or at given rates.

Interest Rate Swaps. The Fund may enter into swap contracts. Swap contracts are contracts in which each party agrees to make a periodic interest payment based on an index or the value of an asset in return for a periodic payment from the other party based on a different index or asset. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate floor. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index rises above a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. Like a traditional investment in a debt security, the Funds could lose money by investing in an interest rate swap if interest rates change adversely. For example, if the Fund enters into a swap where it agrees to exchange a floating rate of interest for a fixed rate of interest, the Fund may have to pay more money than it receives. Similarly, if the Fund enters into a swap where it agrees to exchange a fixed rate of interest for a floating rate of interest, a Fund may receive less money than it has agreed to pay.

Credit Default Swaps. The Fund may enter into credit default swap agreements. The credit default swap agreement may have as a reference obligation one or more securities that are not currently held by the Fund. The buyer in a credit default swap agreement is obligated to pay the seller a periodic fee, typically expressed in basis points on the principal amount of the underlying obligation (the “notional” amount), over the term of the agreement in return for a contingent payment upon the occurrence of a credit event with respect to the underlying reference obligation. A credit event is typically a default, restructuring or bankruptcy.

The Fund may be either the buyer or seller in the transaction. As a seller, the Fund receives a fixed rate of income throughout the term of the agreement, which typically is between one month and five years, provided that no credit event occurs. If a credit event occurs, the Fund typically must pay the contingent payment to the buyer, which is typically the par value (full notional value) of the reference obligation. The contingent payment may be a cash settlement or by physical delivery of the reference obligation in return for payment of the face amount of the obligation. If the Fund is a buyer and no credit event occurs, the Fund may lose its investment and recover nothing. However, if a credit event occurs, the buyer typically receives full notional value for a reference obligation that may have little or no value.

Credit default swaps may involve greater risks than if the Fund had invested in the reference obligation directly. Credit default swaps are subject to general market risk, liquidity risk and credit risk. If the Fund is a buyer in a credit default swap agreement and no credit event occurs, then it will lose its investment. In addition, the value of the reference obligation received by the Fund as a seller if a credit event occurs, coupled with the periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to a Fund.

Currency Swaps. In order to protect against currency fluctuations, the Fund may enter into currency swaps. The Fund may also hedge portfolio positions through currency swaps, which are transactions in which one currency is simultaneously bought for a second currency on a spot basis and sold for the second currency on a forward basis. Currency swaps involve the exchange of the rights of the Fund and another party to make or receive payments in specified currencies. Currency swaps usually involve the delivery of the entire principal value of one designated currency in exchange for the other designated currency. Because currency swaps usually involve the delivery of the entire principal value of one designated currency in exchange for the other designated currency, the entire principal value of a currency swap is subject to the risk that the other party to the swap will default on its contractual delivery obligations.

New Swaps Regulation. The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”) and related regulatory developments have imposed comprehensive new regulatory requirements on swaps and swap market participants. The new regulatory framework includes: (1) registration and regulation of swap dealers and major swap participants; (2) requiring central clearing and execution of standardized swaps; (3) imposing margin requirements on swap transactions; (4) regulating and monitoring swap transactions through position limits and large trader reporting requirements; and (5) imposing record keeping and centralized and public reporting requirements, on an anonymous basis, for most swaps. The CFTC is responsible for the regulation of most swaps, and has completed most of its rules implementing the Dodd-Frank Act swap regulations. The SEC has jurisdiction over a small segment of the market referred to as “security-based swaps,” which includes swaps on single securities or credits, or narrow-based indices of securities or credits, but has not yet completed its rulemaking.

Risks of Swaps. The Fund’s use of swaps is subject to the risks associated with derivative instruments generally. In addition, because uncleared swaps are typically executed bilaterally with a swap dealer rather than traded on exchanges, uncleared swap participants may not be as protected as participants on organized exchanges. Performance of an uncleared swap agreement is the responsibility only of the swap counterparty and not of any exchange or clearinghouse. As a result, the Fund is subject to the risk that a counterparty will be unable or will refuse to perform under such agreement, including because of the counterparty’s bankruptcy or insolvency.

As noted above, under recent financial reforms, certain types of swaps are, and others eventually are expected to be, required to be cleared through a central counterparty, which may affect counterparty risk and other risks faced by the Fund. Central clearing is designed to reduce counterparty credit risk and increase liquidity compared to uncleared swaps because central clearing interposes the central clearinghouse as the counterparty to each participant’s swap, but it does not eliminate those risks completely. The Fund is also subject to the risk that, after entering into a cleared swap with an executing broker, no FCM or central counterparty is willing or able to clear the transaction. In such an event, the Fund may be required to break the trade and make an early termination payment to the executing broker.

With respect to cleared swaps, there is also a risk of loss by the Fund of its initial and variation margin deposits in the event of bankruptcy of the FCM with which the Fund has an open position, or

the central counterparty in a swap contract. The assets of the Fund may not be fully protected in the event of the bankruptcy of the FCM or central counterparty because the Fund might be limited to recovering only a pro rata share of all available funds and margin segregated on behalf of an FCM's customers. If the FCM does not provide accurate reporting, the Fund is also subject to the risk that the FCM could use the Fund's assets, which are held in an omnibus account with assets belonging to the FCM's other customers, to satisfy its own financial obligations or the payment obligations of another customer to the central counterparty. Credit risk of cleared swap participants is concentrated in a few clearinghouses, and the consequences of insolvency of a clearinghouse are not clear.

Risks of Potential Government Regulation of Derivatives. It is possible that additional government regulation of various types of derivative instruments, including futures, options, and swap contracts, may limit or prevent the Fund from using such instruments as part of its investment strategy, and could ultimately prevent the Fund from being able to achieve its investment objective. It is impossible to fully predict the effects of past, present or future legislation and regulation in this area, but the effects could be substantial and adverse. It is possible that legislative and regulatory activity could limit or restrict the ability of the Fund to use certain instruments as part of its investment strategy. Limits or restrictions applicable to the counterparties with which the Fund engages in derivative transactions could also prevent the Fund from using certain instruments.

There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in the Fund or the ability of the Fund to continue to implement its investment strategies. The futures, options, and swaps markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the SEC, the CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits, and the suspension of trading. The regulation of futures, options, and swaps transactions in the U.S. is a rapidly changing area of law and is subject to modification by government action.

New and developing regulation may negatively impact the Fund's ability to meet its investment objective either through limits or requirements imposed on it or upon its counterparties. In particular, any new position limits imposed on the Fund or its counterparties may impact the Fund's ability to invest in futures, options, and swaps in a manner that efficiently meets its investment objective. New requirements, even if not directly applicable to the Fund, including capital requirements and mandatory clearing, may increase the cost of the Fund's investments and cost of doing business, which could adversely affect investors.

Interest Rate Floors, Caps, and Collars. The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payment of interest on a notional principal amount from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling the interest rate floor. An interest rate collar is the combination of a cap and a floor that preserves a certain return within a predetermined range of interest rates.

Warrants and Rights

The Fund may purchase, or receive as a distribution from other investments, warrants and rights, which are instruments that permit the Fund to acquire, by subscription, the capital stock of a corporation at a set price, regardless of the market price for such stock. The principal difference between warrants and rights is their term-rights typically expire within weeks while warrants have longer durations. Neither rights nor warrants have voting rights or pay dividends. The market price

of warrants is usually significantly less than the current price of the underlying stock. Thus, there is a greater risk that warrants might drop in value at a faster rate than the underlying stock.

When-Issued Securities

When-issued securities transactions involve a commitment by the Fund to purchase or sell particular securities with payment and delivery taking place at a future date, and permit the Fund to lock in a price or yield on a security it owns or intends to purchase, regardless of future changes in interest rates or market action. Typically, no income accrues to the purchaser of a security on a when-issued basis prior to delivery. Such securities are recorded as an asset and its value may fluctuate. Purchasing a security on a when-issued basis can involve a risk that the market price at the time of delivery may be lower than the agreed-upon purchase price, in which case there could be an unrealized loss at the time of delivery. The Fund will only make commitments to purchase securities on a when-issued basis with the intention of actually acquiring the securities. As required, the Fund will establish in a segregated account, or earmark as segregated on the books of the Custodian, an amount of liquid assets equal to 102% of the amount of its commitment to purchase securities on a when-issued basis. These assets will be marked-to-market daily, and the Fund will increase the aggregate value of the assets, as necessary, to ensure that the assets are at least equal to 102% of the amount of the Fund's commitments.

Initial Public Offerings

The Fund may invest in securities offered by companies in initial public offerings ("IPOs"). Because IPO shares frequently are volatile in price, the Fund may hold IPO shares for a very short period of time. This may increase the turnover of the Fund's portfolio and may lead to increased expenses to the Fund, such as commissions and transaction costs. By selling IPO shares, the Fund may realize taxable capital gains that it will subsequently distribute to shareholders. Companies that offer securities in IPOs tend to typically have small market capitalizations and therefore their securities may be more volatile and less liquid than those issued by larger companies. Certain companies offering securities in an IPO may have limited operating experience and, as a result face a greater risk of business failure.

Master Limited Partnerships

The Fund may invest in publicly traded master limited partnerships ("MLPs") that are registered under the Securities Exchange Act of 1934, as amended (the "Securities Exchange Act"), and listed on a major United States stock exchange, if the issuer meets the Fund's investment criteria. MLPs are businesses organized as limited partnerships which trade their proportionate shares of the partnership (units) on a public exchange. MLPs are required to pay out most or all of their cash flow in distributions. This pass through creates passive income or losses, along with dividend and investment income. The MLPs the Fund may purchase are comprised of a general partner (the "GP") and multiple limited partners (the "LP Holders"). The GP is responsible for the operations and the maintenance of the partnership's businesses, while the LP Holders assume economic risk up to their level of investment. Typically, the GP has a 1% to 2% investment in the MLP, but can extract a higher percentage of the partnership's profits as the MLP's distributions increase. This serves as an incentive to the GP to grow the partnership's distributions.

MLP common units represent an equity ownership interest in a partnership, providing limited voting rights and entitling the holder to a share of the company's success through distributions and/or capital appreciation. Unlike shareholders of a corporation, common unit holders do not elect directors annually and generally have the right to vote only on certain significant events, such as mergers, a sale of substantially all of the assets, removal of the general partner or material amendments to the partnership agreement. MLPs are required by their partnership agreements to distribute a large percentage of their current operating earnings. Common unit holders generally have first right to a

minimum quarterly distribution prior to distributions to the convertible subordinated unit holders or the general partner (including incentive distributions). Common unit holders typically have arrearage rights if the minimum quarterly distribution is not met. In the event of liquidation, MLP common unit holders have first right to the partnership's remaining assets after bondholders, other debt holders, and preferred unit holders have been paid in full.

Some companies in which the Fund may invest have been organized as limited liability companies (MLP LLCs). Such MLP LLCs generally are treated in the same manner as MLPs for federal income tax purposes (i.e., generally taxed as partnerships). MLP LLC common units trade on a national securities exchange or OTC. In contrast to MLPs, MLP LLCs have no general partner and there are generally no incentives that entitle management or other unitholders to increased percentages of cash distributions as distributions reach higher target levels. In addition, MLP LLC common unitholders typically have voting rights with respect to the MLP LLC, whereas MLP common units have limited voting rights.

Investments in securities of an MLP involve risks that differ from investments in common stock, including risks related to limited control and limited rights to vote on matters affecting the MLP, risks related to potential conflicts of interest between the MLP and the MLP's general partner, cash flow risks, dilution risks and risks related to the general partner's right to require unit-holders to sell their common units at an undesirable time or price. Certain MLP securities may trade in lower volumes due to their smaller capitalizations, and may be subject to more abrupt or erratic price movements and lower market liquidity.

Generally speaking, MLP investment returns are enhanced during periods of declining or low interest rates and tend to be negatively influenced when interest rates are rising. During periods of interest rate volatility, these investments may not provide attractive returns. As an income vehicle, the unit price can be influenced by general interest rate trends independent of specific underlying fundamentals. In addition, most MLPs are fairly leveraged and typically carry a portion of a "floating" rate debt. As such, a significant upward swing in interest rates would also drive interest expense higher. Furthermore, most MLPs grow by acquisitions partly financed by debt, and higher interest rates could make it more difficult to make acquisitions.

There are also certain tax risks undertaken by the Fund when it invests in MLPs. MLPs are generally treated as partnerships for U.S. federal income tax purposes. Partnerships do not pay U.S. federal income tax at the partnership level. Rather, each partner is allocated a share of the partnership's income, gains, losses, deductions and expenses. A change in current tax law or a change in the underlying business mix of a given MLP could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in the MLP being required to pay U.S. federal income tax (as well as state and local income taxes) on its taxable income. This would have the effect of reducing the amount of cash available for distribution by the MLP and could result in a reduction in the value of the Fund's investment in the MLP and lower income to the Fund. Also, to the extent a distribution received by a Fund from an MLP is treated as a return of capital, the Fund's adjusted tax basis in the interests of the MLP will be reduced, which may increase the Fund's tax liability upon the sale of the interests in the MLP or upon subsequent distributions in respect of such interests.

Private Placements and Restricted Securities

The Fund may invest in restricted securities (securities with limited transferability under the securities laws) acquired from the issuer in "private placement" transactions. Private placement securities are not registered under the Securities Act of 1933, as amended (the "Securities Act"), and are subject to restrictions on resale. They are eligible for sale only to certain qualified institutional buyers, like the Fund, and are not sold on a trading market or exchange. While private placement securities offer

attractive investment opportunities otherwise not available on an open market, because such securities are available to few buyers, they are often both difficult to sell and to value. Certain of the Fund's investments may be placed in smaller, less seasoned, issuers that present a greater risk due to limited product lines and/or financial resources. The issuer of privately placed securities may not be subject to the disclosure and other investor protection requirements of a public trade. Additionally, the Fund could obtain material non-public information from the issuer of such securities that would restrict the Fund's ability to conduct transactions in underlying securities.

Privately placed securities can usually only be resold to other qualified institutional buyers, or in a private transaction, or to a limited number of purchasers, or in limited quantities after they have been held for a specified period of time and other conditions are met pursuant to an exemption from registration. The Fund may incur more cost in the disposition of such securities because of the time and legal expense required to negotiate a private placement. Because of the limited market, the Fund may find it difficult to sell the securities when it finds it advisable to do so and, to the extent such securities are sold in private negotiations, they may be sold for less than the price for which they were purchased or less than their fair market value.

Privately placed securities cannot be resold to the public unless they have been registered under the Securities Act or pursuant to an exemption, such as Rule 144A. Although securities which may be resold only to "qualified institutional buyers" in accordance with the provisions of Rule 144A under the Securities Act are technically considered "restricted securities," the Fund may purchase Rule 144A securities without regard to the limitation on investments in illiquid securities, described in the "Illiquid Securities" section below, provided that a determination is made that such securities have a readily available trading market. The Fund may also purchase certain commercial paper issued in reliance on the exemption from regulations in Section 4(2) of the Securities Act ("4(2) Paper"). The Adviser will determine the liquidity of Rule 144A securities and 4(2) Paper under the supervision of the Board. The liquidity of Rule 144A securities and 4(2) Paper will be monitored by the Adviser, and if as a result of changed conditions it is determined that a Rule 144A security or 4(2) Paper is no longer liquid, the Fund's holdings of illiquid securities will be reviewed to determine what, if any, action is required to assure that the Fund does not exceed its percentage limitation for investments in illiquid securities.

Cash Investments

The Fund may invest in high-quality, short-term debt securities and money market instruments ("Cash Investments") for (i) temporary defensive purposes in amounts up to 100% of the Fund's assets in response to adverse market, economic, or political conditions and (ii) retaining flexibility in meeting redemptions, paying expenses, and identifying and assessing investment opportunities. Cash Investments include shares of other mutual funds, certificates of deposit, bankers' acceptances, time deposits, savings association obligations, commercial paper, short-term notes (including discount notes), and other obligations.

The Fund may hold a substantial position in Cash Investments for long periods of time, which may result in the Fund not achieving its investment objective. If the market advances during periods when the Fund is holding a large Cash Investment, the Fund may not participate to the extent it would have if the Fund had been more fully invested. To the extent that the Fund uses a money market fund for its Cash Investment, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market fund's advisory fees and operational expenses.

Cash Investments are subject to credit risk and interest rate risk, although to a lesser extent than longer-term debt securities, due to Cash Investments' short-term, significant liquidity, and typical high credit quality.

The Fund may invest in any of the following Cash Investments:

Money Market Mutual Funds. Generally, money market mutual funds seek to earn income consistent with the preservation of capital and maintenance of liquidity. They primarily invest in high quality money market obligations, including U.S. government obligations, bank obligations and high-grade corporate instruments. These investments generally mature within 397 calendar days from the date of acquisition. An investment in a money market mutual fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any government agency.

To the extent that the Fund invests in money market mutual funds, your cost of investing in the Fund will generally be higher because you will indirectly bear fees and expenses charged by the underlying money market mutual funds in addition to the Fund's direct fees and expenses. Furthermore, investing in money market mutual funds could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes payable by you.

Bank Certificates of Deposit, Bankers' Acceptances and Time Deposits. The Fund may acquire certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against monies deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by the Fund will be dollar-denominated obligations of domestic or foreign banks or financial institutions which at the time of purchase have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports, or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. government.

In addition to purchasing certificates of deposit and bankers' acceptances, to the extent permitted under the investment objective and policies stated above and in the Prospectus, the Fund may make interest-bearing time deposits or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Savings Association Obligations. The Fund may invest in certificates of deposit (interest-bearing time deposits) issued by savings banks or savings and loan associations that have capital, surplus and undivided profits in excess of \$100 million, based on latest published reports, or less than \$100 million if the principal amount of such obligations is fully insured by the U.S. government.

Commercial Paper, Short-Term Notes and Other Corporate Obligations. The Fund may invest a portion of its assets in commercial paper, short-term notes, and other corporate obligations. Commercial paper consists of unsecured promissory notes issued by corporations. Issues of commercial paper and short-term notes will normally have maturities of less than nine months and fixed rates of return, although such instruments may have maturities of up to one year.

Commercial paper and short-term notes will consist of issues rated at the time of purchase "A-2" or higher by S&P, "Prime-1" or "Prime-2" by Moody's, or similarly rated by another nationally recognized statistical rating organization or, if unrated, determined by the Adviser to be of comparable quality.

Corporate obligations include bonds and notes issued by corporations to finance longer-term credit needs than supported by commercial paper. While such obligations generally have maturities of ten years or more, the Fund may purchase corporate obligations which have remaining maturities of one year or less from the date of purchase and which are rated “A” or higher by S&P, “A” or higher by Moody’s, similarly rated by another nationally recognized statistical rating organization, or, if unrated, determined by the Adviser to be of comparable quality.

Investment Companies

The Fund may invest in other investment companies to the extent permitted by the 1940 Act. The Fund generally may purchase or redeem, without limitation, shares of any affiliated or unaffiliated money market funds, including unregistered money market funds, so long as the Fund does not pay a sales load or service fee in connection with the purchase, sale, or redemption, or if such fees are paid, and the Fund’s investment adviser waives its management fee in an amount necessary to offset the amounts paid. With respect to other investments in investment companies, the 1940 Act generally limits the Fund from acquiring (i) more than 3% of the total outstanding shares of another investment company; (ii) shares of another investment company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) shares of another registered investment company and all other investment companies having an aggregate value in excess of 10% of the value of the total assets of the Fund.

Investments by the Fund in other investment companies will be subject to the limitations of the 1940 Act (including limitations on sales charges), and the rules and regulations thereunder. By investing in securities of an investment company, the Fund’s shareholders will indirectly bear the fees and expenses of that underlying fund in addition to the Fund’s own fees and expenses.

Closed-End Funds. Closed-end funds are investment companies that typically issue a fixed number of shares that trade on a securities exchange or over-the-counter. The risks of investment in closed-end funds typically reflect the risk of the types of securities in which the funds invest. Investments in closed-end funds are subject to the additional risk that shares of the fund may trade at a premium or discount to their net asset value (“NAV”) per share. Closed-end funds come in many varieties and can have different investment objectives, strategies and investment portfolios. They also can be subject to different risks, volatility and fees and expenses. Although closed-end funds are generally listed and traded on an exchange, the degree of liquidity, or ability to be bought and sold, will vary significantly from one closed-end fund to another based on various factors including, but not limited to, demand in the marketplace. When the Fund invests in shares of a closed-end fund, shareholders of the Fund bear their proportionate share of the closed-end fund’s fees and expenses, as well as their share of the Fund’s fees and expenses.

Open-End Mutual Funds. Open-end mutual funds are investment companies that issue new shares continuously and redeem shares daily. The risks of investment of open-end mutual funds typically reflect securities in which the funds invest. The NAV per share of an open-end fund will fluctuate daily depending upon the performance of the securities held by the fund. Each open-end fund may have a different investment objective and strategy and different investment portfolio. Different funds may also be subject to different risks, volatility and fees and expenses. When a Fund invests in shares of an open-end fund, shareholders of the Fund bear their proportionate share of the open-end funds’ fees and expenses, as well as their share of the Fund’s fees and expenses.

Exchange-Traded Funds. Exchange-traded funds (“ETFs”) are typically open-end investment companies that are bought and sold on a national securities exchange. When the Fund invests in an ETF, it will bear additional expenses based on its pro rata share of the ETF’s operating expenses, including the potential duplication of management fees. The risk of owning an ETF generally reflects

the risks of owning the underlying securities it holds. Many ETFs seek to replicate a specific benchmark index. However, an ETF may not fully replicate the performance of its benchmark index for many reasons, including because of the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or the number of stocks held. Some ETFs are actively managed and instead of replicating, they seek to outperform a particular index or basket or price of a commodity or currency. In addition, shares of an ETF may trade at a market price that is higher or lower than their NAV and an active trading market in such shares may not develop or continue. Lack of liquidity in an ETF could result in an ETF being more volatile than the underlying portfolio of securities it holds. In addition, because of ETF expenses, compared to owning the underlying securities directly, it may be more costly to own an ETF.

If the Fund invests in shares of an ETF, shareholders will indirectly bear fees and expenses charged by the underlying ETF in which the Fund invests in addition to the Fund's direct fees and expenses. The Fund also will incur brokerage costs when it purchases ETFs. Furthermore, investments in other ETFs could affect the timing, amount and character of distributions to shareholders and therefore may increase the amount of taxes payable by investors in the Fund.

Securities Lending

The Fund may lend its securities in order to increase the return on its portfolio. The SEC currently requires that the following conditions must be met whenever the Fund's portfolio securities are loaned: (1) the Fund must receive at least 100% cash collateral from the borrower; (2) the borrower must increase such collateral whenever the market value of the securities rises above the level of such collateral; (3) the Fund must be able to terminate the loan at any time; (4) the Fund must receive reasonable interest on the loan, as well as any dividends, interest or other distributions on the loaned securities, and any increase in market value; (5) the Fund may pay only reasonable custodian fees approved by the Board in connection with the loan; (6) while voting rights on the loaned securities may pass to the borrower, the Board must terminate the loan and regain the right to vote the securities if a material event adversely affecting the investment occurs, and (7) the Fund may not loan its portfolio securities so that the value of the loaned securities is more than one-third of its total asset value, including collateral received from such loans. These conditions may be subject to future modification. Such loans will be terminable at any time upon specified notice. The Fund might experience the risk of loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund. In addition, the Fund will not enter into any portfolio security lending arrangement having a duration of longer than one year. The principal risk of portfolio lending is potential default or insolvency of the borrower. In either of these cases, the Fund could experience delays in recovering securities or collateral or could lose all or part of the value of the loaned securities. As part of participating in a lending program, the Fund may be required to invest in collateralized debt or other securities that bear the risk of loss of principal. In addition, all investments made with the collateral received are subject to the risks associated with such investments. If such investments lose value, the Fund will have to cover the loss when repaying the collateral.

The Board appoints agents to be responsible for monitoring the creditworthiness of borrowers. To the extent the Fund is participating in securities lending, on a quarterly basis, the Board reviews a report regarding the Fund's loans. Such report includes, among other things, the identity and value of all securities comprising each loan, the length of time that the loan has been outstanding, the amount earned by the Fund, the amount of fees paid in connection with the loan and the ratio of the value of the collateral to the value of the loan.

Any loans of portfolio securities are fully collateralized based on values that are marked-to-market daily. Any securities that the Fund may receive as collateral will not become part of the Fund's investment portfolio at the time of the loan and, in the event of a default by the borrower, the Fund will, if permitted by law, dispose of such collateral except for such part thereof that is a security in which the Fund is permitted to invest. During the time securities are on loan, the borrower will pay the Fund any accrued income on those securities, and the Fund may invest the cash collateral and earn income or receive an agreed-upon fee from a borrower that has delivered cash-equivalent collateral.

Illiquid Securities

Historically, illiquid securities have included securities subject to contractual or legal restrictions on resale because they have not been registered under the Securities Act, securities which are otherwise not readily marketable, and securities such as repurchase agreements having a maturity of longer than seven days and purchased OTC options. Securities which have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. In recent years, however, a large institutional market has developed for certain securities that are not registered under the Securities Act, including repurchase agreements, commercial paper, foreign securities, municipal securities and corporate bonds and notes. Institutional investors depend on an efficient institutional market in which the unregistered security can be readily resold or on an issuer's ability to honor a demand for repayment. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. The Board may determine that such securities are not illiquid securities notwithstanding their legal or contractual restrictions on resale. In all other cases, however, securities subject to restrictions on resale will be deemed illiquid. The Fund will determine a security to be illiquid if it cannot be sold or disposed of in the ordinary course of business within seven days at the value at which the Fund has valued the security. Factors considered in determining whether a security is illiquid may include, but are not limited to: the frequency of trades and quotes for the security; the number of dealers willing to purchase and sell the security and the number of potential purchasers; the number of dealers who undertake to make a market in the security; the nature of the security, including whether it is registered or unregistered, and the market place; whether the security has been rated by an NRSRO; the period of time remaining until the maturity of a debt instrument or until the principal amount of a demand instrument can be recovered through demand; the nature of any restrictions on resale; and with respect to municipal lease obligations and certificates of participation, whether there is reasonable assurance that the obligation will remain liquid throughout the time the obligation is held and, if unrated, whether an analysis similar to that which would be performed by an NRSRO is performed. The Fund will not hold more than 15% of the value of its net assets in illiquid securities, including repurchase agreements providing for settlement in more than seven days after notice, non-negotiable fixed time deposits with maturities over seven days, over-the-counter options and certain restricted securities not determined by the Board to be liquid.

Repurchase Agreements

The Fund may enter into repurchase agreements. Under such agreements, the Fund agrees to purchase U.S. government obligations from a counterparty and the counterparty agrees to repurchase the securities at a mutually agreed upon time and price. The repurchase price may be higher than the purchase price, the difference being income to the Fund, or the purchase and repurchase prices may be the same, with interest at a stated rate due to the Fund together with the repurchase price on repurchase. In either case, the income to the Fund is unrelated to the interest rate on the security itself. Such repurchase agreements will be made only with banks with assets of \$500 million or more that are insured by the Federal Deposit Insurance Corporation or with government securities dealers recognized by the Federal Reserve Board and registered as broker-dealers with the SEC or exempt from such registration. The Fund will generally enter into repurchase agreements of short durations,

from overnight to one week, although the underlying securities generally have longer maturities. The Fund may not enter into a repurchase agreement with more than seven days to maturity if, as a result, more than 15% of the value of the Fund's net assets would be invested in illiquid securities including such repurchase agreements. To the extent necessary to facilitate compliance with Section 12(d)(3) of the 1940 Act and Rule 12d3-1 promulgated thereunder, the Fund will ensure that repurchase agreements will be collateralized fully to the extent required by Rule 5b-3.

For purposes of the 1940 Act, a repurchase agreement is deemed to be a loan from the Fund to the seller of the U.S. government obligations that are subject to the repurchase agreement. It is not clear whether a court would consider the U.S. government obligations to be acquired by the Fund subject to a repurchase agreement as being owned by the Fund or as being collateral for a loan by the Fund to the seller. In the event of the commencement of bankruptcy or insolvency proceedings with respect to the seller of the U.S. government obligations before its repurchase under a repurchase agreement, the Fund could encounter delays and incur costs before being able to sell the underlying U.S. government obligations. Delays may involve loss of interest or a decline in price of the U.S. government obligations. If a court characterizes the transaction as a loan and the Fund has not perfected a security interest in the U.S. government obligations, the Fund may be required to return the securities to the seller's estate and be treated as an unsecured creditor of the seller. As an unsecured creditor, the Fund would be at the risk of losing some or all of the principal and income involved in the transaction. As with any unsecured debt instrument purchased for the Fund, the Adviser seeks to minimize the risk of loss through repurchase agreements by analyzing the creditworthiness of the other party, in this case the seller of the U.S. government security.

Apart from the risk of bankruptcy or insolvency proceedings, there is also the risk that the seller may fail to repurchase the U.S. government obligations. However, the Fund will always receive as collateral for any repurchase agreement to which it is a party securities acceptable to the Adviser, the market value of which is equal to at least 100% of the repurchase price, and the Fund will make payment against such securities only upon physical delivery or evidence of book entry transfer to the account of its Custodian. If the market value of the U.S. government obligations subject to the repurchase agreement become less than the repurchase price (including interest), the Fund will direct the seller of the U.S. government obligations to deliver additional securities so that the market value of all securities subject to the repurchase agreement will equal or exceed the repurchase price. It is possible that the Fund could be unsuccessful in seeking to enforce on the seller a contractual obligation to deliver additional securities.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements for temporary purposes with banks and securities dealers if the creditworthiness of the bank or securities dealer has been determined by the Adviser to be satisfactory. A reverse repurchase agreement is a repurchase agreement in which the Fund is the seller of, rather than the investor in, securities and agrees to repurchase them at an agreed-upon time and price. Use of a reverse repurchase agreement may be preferable to a regular sale and later repurchase of securities because it avoids certain market risks and transaction costs.

At the time when the Fund enters into a reverse repurchase agreement, the Fund's liquid assets (such as cash, U.S. government securities or other "high-grade" debt obligations), having a value at least as great as the purchase price of the securities to be purchased, will be segregated on the Fund's books and held by the Custodian throughout the period of the obligation. Reverse repurchase agreements are considered a form of borrowing, and the Fund's use of reverse repurchase agreements creates leverage which increases its investment risk. If the income and gains on securities purchased with the proceeds of these transactions exceed the cost, the Fund's earnings or NAV will increase faster than otherwise would be the case; conversely, if the income and gains fail to exceed the cost, earnings or

NAV would decline faster than otherwise would be the case. The Fund intends to enter into reverse repurchase agreements only if the income from the investment of the proceeds is expected to be greater than the expense of the transaction, because the proceeds are invested for a period no longer than the term of the reverse repurchase agreement.

Borrowing

The Fund may borrow money in amounts of up to one-third of its total assets (including the amount borrowed) from banks for investment purposes. In addition, the Fund is authorized to borrow money from time to time for temporary, extraordinary or emergency purposes or for clearance of transactions. The use of borrowing by the Fund involves special risk considerations that may not be associated with other funds having similar objectives and policies. Since substantially all of the Fund's assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of the Fund's agreement with its lender, the NAV per share of the Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if the Fund did not borrow funds. In addition, interest costs on borrowings, which are paid by the Fund, may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

Cybersecurity Risk

The Fund, like all companies, may be susceptible to operational and information security risks. Cybersecurity failures or breaches of the Fund or its service providers or the issuers of securities in which the Fund invests have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, the inability of Fund shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs. The Fund and its shareholders could be negatively impacted as a result.

Fundamental and Non-Fundamental Investment Limitations

The Trust (on behalf of the Fund) has adopted the following restrictions as fundamental policies, which may not be changed without the favorable "vote of the holders of a majority of the outstanding voting securities" of the Fund, as defined under the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented; or (ii) more than 50% of the outstanding shares of the Fund.

The Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its total assets (including the amount borrowed) less liabilities (other than borrowings); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions, reverse repurchase agreements, purchasing securities on a when-issued, delayed delivery, or forward delivery basis, or short sales in accordance with its objectives and strategies;
2. Underwrite the securities of other issuers (except that the Fund may engage in transactions involving the acquisition, disposition or resale of its portfolio securities under circumstances where it may be considered to be an underwriter under the Securities Act);

3. Purchase or sell real estate or interests in real estate, unless acquired as a result of ownership of securities (although the Fund may purchase and sell securities which are secured by real estate and securities of companies that invest or deal in real estate);
4. Purchase or sell physical commodities or commodities contracts, unless acquired as a result of ownership of securities or other instruments, and provided that this restriction does not prevent the Fund from engaging in transactions involving currencies and futures contracts and options thereon or investing in securities or other instruments that are secured by physical commodities;
5. Make loans of money (except for the lending of the Fund's portfolio securities, repurchase agreements and purchases of debt securities consistent with the investment policies of the Fund);
6. Invest in the securities of any one industry or group of industries if, as a result, 25% or more of the Fund's total assets would be invested in the securities of such industry or group of industries, except that the foregoing does not apply to securities issued or guaranteed by the U.S. government, its agencies or instrumentalities; or
7. With respect to 75% of the Fund's total assets, purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government or any of its agencies or instrumentalities, or, to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief, securities of other investment companies) if, as a result, (1) more than 5% of the Fund's total assets would be invested in the securities of that issuer; or (2) the Fund would hold more than 10% of the outstanding voting securities of that issuer.

Below is the only non-fundamental investment restriction applicable to the Fund. This restriction can be changed by the Board, but the change will only be effective after prior written notice is given to shareholders of the Fund.

The Fund may not hold more than 15% of the value of its net assets in illiquid securities. Illiquid securities are those securities that cannot be disposed of within seven days in the ordinary course of business at approximately the amount at which the Fund has valued them. Illiquid securities may include restricted securities not determined by the Board to be liquid, non-negotiable time deposits, over-the-counter options, and repurchase agreements providing for settlement in more than seven days after notice.

Except with respect to borrowing and investments in illiquid securities, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation. With respect to borrowing, if at any time the Fund's borrowings exceed one-third of its total assets (including the amount borrowed) less liabilities (other than borrowings), such borrowings will be reduced within three days, (not including Sundays and holidays) or such longer period as may be permitted by the 1940 Act, to the extent necessary to comply with the one-third limitation.

Management of the Fund

Board of Trustees

The management and affairs of the Fund are supervised by the Board. The Board consists of four individuals. The Trustees are fiduciaries for the Fund's shareholders and are governed by the laws of the State of Delaware in this regard. The Board establishes policies for the operation of the Fund and appoints the officers who conduct the daily business of the Fund.

The Role of the Board of Trustees

The Board provides oversight of the management and operations of the Trust. Like all mutual funds, the day-to-day responsibility for the management and operation of the Trust is the responsibility of various service providers to the Trust and its individual series, such as the Adviser, Distributor, Administrator, Custodian, and Transfer Agent, each of whom are discussed in greater detail in this SAI. The Board approves all significant agreements between the Trust and its service providers, including the agreements with the Adviser, Distributor, Administrator, Custodian and Transfer Agent. The Board has appointed various individuals of certain of these service providers as officers of the Trust, with responsibility to monitor and report to the Board on the Trust's day-to-day operations. In conducting this oversight, the Board receives regular reports from these officers and service providers regarding the Trust's operations. The Board has appointed a Chief Compliance Officer ("CCO") who reports directly to the Board and who administers the Trust's compliance program and regularly reports to the Board as to compliance matters, including an annual compliance review. Some of these reports are provided as part of formal "Board Meetings," which are held four times per year, in person, and such other times as the Board determines is necessary, and involve the Board's review of recent Trust operations. From time to time one or more members of the Board may also meet with Trust officers in less formal settings, between formal Board Meetings to discuss various topics. In all cases, however, the role of the Board and of any individual Trustee is one of oversight and not of management of the day-to-day affairs of the Trust and its oversight role does not make the Board a guarantor of the Trust's investments, operations or activities.

Board Leadership Structure

The Board has structured itself in a manner that it believes allows it to effectively perform its oversight function. The Board is comprised of three Trustees that are not considered to be "interested persons," of the Trust as defined by the 1940 Act ("Independent Trustees") – Messrs. David A. Massart, Leonard M. Rush and David M. Swanson – and one Interested Trustee – Mr. Robert J. Kern. Accordingly, 75% of the members of the Board are Independent Trustees, who are Trustees that are not affiliated with any investment adviser to the Trust or their respective affiliates or other service providers to the Trust or any Trust series. The Board has established three standing committees, an Audit Committee, a Nominating Committee and a Valuation Committee, which are discussed in greater detail under "Board Committees" below. Each of the Audit Committee and the Nominating Committee are comprised entirely of Independent Trustees. The Independent Trustees have engaged independent counsel to advise them on matters relating to their responsibilities in connection with the Trust.

The Trust's Chairman, Mr. Kern, is an "interested person" of the Trust, as defined by the 1940 Act, by virtue of the fact that he is a board member (and therefore an interested person) of Quasar Distributors, LLC, which acts as principal underwriter to many of the Trust's underlying funds. Mr. Kern also serves as an Executive Vice President of the Administrator. The Independent Trustees have appointed Leonard M. Rush as lead Independent Trustee, with responsibilities to coordinate activities of the Independent Trustees, act as a liaison with the Trust's service providers, officers,

legal counsel, and other Trustees between meetings, help to set Board meeting agendas, and serve as chair during executive sessions of the Independent Trustees.

In accordance with the fund governance standards prescribed by the SEC under the 1940 Act, the Independent Trustees on the Nominating Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board because of his experience, qualifications, attributes and skills as set forth in the subsection “Trustee Qualifications” below.

The Board reviews its structure regularly in light of the characteristics and circumstances of the Trust, including: the unaffiliated nature of each investment adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent distribution arrangements of each of the Trust’s underlying funds.

The Board has determined that the appointment of a lead Independent Trustee and the function and composition of the Audit Committee and the Nominating Committee are appropriate means to address any potential conflicts of interest that may arise from the Chairman’s status as an Interested Trustee. In addition, the inclusion of all Independent Trustees as members of the Audit Committee and the Nominating Committee allows all such Trustees to participate in the full range of the Board’s oversight duties, including oversight of risk management processes discussed below. Given the composition of the Board and the function and composition of its various committees as described above, the Trust has determined that the Board’s leadership structure is appropriate.

Board Oversight of Risk Management

As part of its oversight function, the Board receives and reviews various risk management reports and assessments and discusses these matters with appropriate management and other personnel, including personnel of the Trust’s service providers. Because risk management is a broad concept comprised of many elements (such as, for example, investment risk, issuer and counter-party risk, compliance risk, operational risk, business continuity risk, etc.) the oversight of different types of risks is handled in different ways. For example, the CCO regularly reports to the Board during Board Meetings and meets in executive session with the Independent Trustees and their legal counsel to discuss compliance and operational risks. In addition, Mr. Rush, the Independent Trustee designated as the Audit Committee’s “audit committee financial expert,” meets with the President, Treasurer and the Fund’s independent registered public accounting firm to discuss, among other things, the internal control structure of the Fund’s financial reporting function. The full Board receives reports from the investment advisers to the underlying funds and the portfolio managers as to investment risks.

Trustees and Officers

The Trustees and officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years

Name, Address and Year of Birth	Position(s) Held with the Trust	Term of Office and Length of Time Served	Number of Portfolios in Trust Overseen by Trustee	Principal Occupation(s) During the Past Five Years	Other Directorships Held by Trustee During the Past Five Years
---------------------------------	---------------------------------	--	---	--	--

Independent Trustees

Leonard M. Rush, CPA 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1946	Lead Independent Trustee and Audit Committee Chairman	Indefinite Term; Since April 2011	35	Retired; Chief Financial Officer, Robert W. Baird & Co. Incorporated, (2000-2011).	Independent Trustee, ETF Series Solutions (13 Portfolios) (2012-Present); Director, Anchor Bancorp Wisconsin, Inc. (2011-2013)
David A. Massart 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1967	Trustee and Valuation Committee Chairman	Indefinite Term; Since April 2011	35	Co-Founder and Chief Investment Strategist, Next Generation Wealth Management, Inc. (2005-present).	Independent Trustee, ETF Series Solutions (13 Portfolios) (2012-Present)
David M. Swanson 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1957	Trustee	Indefinite Term; Since April 2011	35	Founder and Managing Principal, SwanDog Strategic Marketing, LLC (2006-present); Executive Vice President, Calamos Investments (2004- 2006).	Independent Trustee, ALPS Variable Investment Trust (9 Portfolios) (2006-Present) Independent Trustee, RiverNorth Opportunities Closed-End Fund (2015-Present)

Interested Trustee

Robert J. Kern* 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1958	Chairman, and Trustee	Indefinite Term; Since January 2011	35	Executive Vice President, U.S. Bancorp Fund Services, LLC (1994-present).	None

Jeanine M. Bajczyk, Esq. 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1965	Secretary	Indefinite Term; Since August 2015	N/A	Senior Vice President and Counsel, U.S. Bancorp Fund Services, LLC (2006-present).	N/A
Thomas A. Bausch, Esq. 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1979	Assistant Secretary	Indefinite Term; Since May 2016	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2016- present); Associate, Godfrey & Kahn S.C. (2012-2016); Graduate, University of Wisconsin Law School (2009- 2012).	N/A
Ryan L. Roell 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1973	Assistant Treasurer	Indefinite Term; Since September 2012	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2005- present).	N/A
Benjamin Eirich 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1981	Assistant Treasurer	Indefinite Term; Since May 2016	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2008- present)	N/A
Doug Schafer 615 E. Michigan St. Milwaukee, WI 53202 Year of Birth: 1970	Assistant Treasurer	Indefinite Term; Since May 2016	N/A	Assistant Vice President, U.S. Bancorp Fund Services, LLC (2002- present)	N/A

* Mr. Kern is an “interested person” of the Trust, as defined by the 1940 Act, by virtue of the fact that he is an interested person of Quasar Distributors, LLC, the Fund’s principal underwriter.

Trustee Qualifications

The Board believes that each of the Trustees has the qualifications, experience, attributes and skills appropriate to their continued service as Trustees of the Trust in light of the Trust’s business and structure. The Trustees have substantial business and professional backgrounds that indicate they have the ability to critically review, evaluate and assess information provided to them. Certain of these business and professional experiences are set forth in detail in the table above. In addition, the Trustees have substantial board experience and, in their service to the Trust, have gained substantial insight as to the operation of the Trust. The Board annually conducts a “self-assessment” wherein the effectiveness of the Board and the individual Trustees is reviewed.

In addition to the information provided in the table above, below is certain additional information concerning each individual Trustee. The information provided below, and in the table above, is not all-inclusive. Many of the Trustees’ qualifications to serve on the Board involve intangible elements, such as intelligence, integrity, work ethic, the ability to work together, the ability to communicate effectively, the ability to exercise judgment, the ability to ask incisive questions, and commitment to shareholder interests.

Mr. Kern’s trustee attributes include substantial industry experience, including his 35 years of service with U.S. Bancorp Fund Services, LLC (the fund accountant (“Fund Accountant”), fund administrator (“Administrator”), and transfer agent (“Transfer Agent”) to the Trust) where he manages business development and has previously managed the mutual fund Transfer Agent operation including investor services, account services, legal compliance, document processing and systems support. He also serves as a board member of U.S. Bancorp Fund Services, LLC and Quasar Distributors, LLC (the principal underwriter to the Trust). The Board believes Mr. Kern’s experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Massart’s trustee attributes include substantial industry experience, including 24 years working with high net worth individuals, families, trusts and retirement accounts to make strategic and tactical asset allocation decisions, evaluate and select investment managers and manage client relationships. He is currently the Chief Investment Strategist and lead member of the investment management committee of the SEC registered investment advisory firm he co-founded. Previously, he served as Managing Director of Strong Private Client and as a Manager of Wells Fargo Investments, LLC. The Board believes Mr. Massart’s experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Rush’s trustee attributes include substantial industry experience, including serving in several different senior executive roles at various global financial services firms. He most recently served as Managing Director and Chief Financial Officer of Robert W. Baird & Co. Incorporated and several other affiliated entities, and served as the Treasurer for Baird Funds. He also served as the Chief Financial Officer for Fidelity Investments’ four broker-dealers and has substantial experience with mutual fund and investment advisory organizations and related businesses, including Vice President and Head of Compliance for Fidelity Investments, a Vice President at Credit Suisse First Boston, a Manager with Goldman Sachs, & Co. and a Senior Manager with Deloitte & Touche. Mr. Rush has been determined to qualify as an Audit Committee Financial Expert for the Trust. The Board believes

Mr. Rush’s experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee and as the lead Independent Trustee to carry out oversight responsibilities with respect to the Trust.

Mr. Swanson’s trustee attributes include substantial industry experience, including 36 years of senior management and marketing experience with 29 years dedicated to the financial services industry. He is currently the Founder and Managing Principal of a marketing strategy boutique serving asset and wealth management businesses. He has also served as Chief Operating Officer and Chief Marketing Officer of Van Kampen Investments, President and Chief Executive Officer of Scudder, Stevens & Clark, Canada, Ltd., Managing Director and Head of Global Investment Products at Morgan Stanley, Director of Marketing for Morgan Stanley Mutual Funds, Director of Marketing for Kemper Funds, and Executive Vice President and Head of Distribution for Calamos Investments. The Board believes Mr. Swanson’s experience, qualifications, attributes and skills on an individual basis and in combination with those of the other Trustees lead to the conclusion that he possesses the requisite skills and attributes as a Trustee to carry out oversight responsibilities with respect to the Trust.

This discussion of the Trustees’ experience and qualifications is pursuant to SEC requirements, does not constitute holding out the Board or any Trustee as having special expertise, and shall not impose any greater responsibility or liability on any such Trustee or the Board by reason thereof.

Trustee and Management Ownership of Fund Shares

The following table shows the dollar range of Fund shares and shares in all portfolios of the Trust beneficially owned by the Trustees as of the calendar year ended December 31, 2016.

	Dollar Range of Fund Shares Beneficially Owned (None, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, Over \$100,000)	Aggregate Dollar Range of Shares in the Trust
Independent Trustees		
David A. Massart	None	None
Leonard M. Rush	None	None
David M. Swanson	\$1-\$10,000	\$50,001-\$100,000
Interested Trustee		
Robert J. Kern	None	None

As of December 31, 2016, the Trustees and Officers of the Trust as a group did not own more than 1% of the outstanding shares of the Fund.

Board Committees

Audit Committee. The Trust has an Audit Committee, which is comprised of the Independent Trustees. The Audit Committee reviews financial statements and other audit-related matters for the Fund. The Audit Committee also holds discussions with management and with the Fund’s independent registered public accounting firm concerning the scope of the audit and the auditor’s independence. The Audit Committee met two times with respect to the Fund during its fiscal year ended September 30, 2016.

Nominating Committee. The Trust has a Nominating Committee, which is comprised of the Independent Trustees. The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary.

The Nominating Committee will consider nominees recommended by shareholders for vacancies on the Board. Recommendations for consideration by the Nominating Committee should be sent to the President of the Trust in writing together with the appropriate biographical information concerning each such proposed nominee, and such recommendation must comply with the notice provisions set forth in the Trust's Bylaws. In general, to comply with such procedures, such nominations, together with all required information, must be delivered to and received by the President of the Trust at the principal executive office of the Trust not later than 120 days, and no more than 150 days, prior to the shareholder meeting at which any such nominee would be voted on. Shareholder recommendations for nominations to the Board will be accepted on an ongoing basis. The Nominating Committee's procedures with respect to reviewing shareholder nominations will be disclosed as required by applicable securities laws. The Nominating Committee did not meet during the Fund's fiscal year ended September 30, 2016.

Valuation Committee. The Trust has a Valuation Committee. The Valuation Committee is responsible for the following: (1) monitoring the valuation of Fund securities and other investments; and (2) as required, when the Board is not in session, determining the fair value of illiquid securities and other holdings after consideration of all relevant factors, which determinations are reported to the Board. The Valuation Committee is currently comprised of one or more Independent Trustees and the Trust's Chairman, President, Treasurer and Assistant Treasurers. The Valuation Committee meets as necessary when a price for a portfolio security is not readily available. Any one of the Chairman, President, Treasurer or Assistant Treasurers and an Independent Trustee must be present for the Valuation Committee to meet. The primary members of the Valuation Committees are the President and Mr. Massart. The Valuation Committee did not meet with respect to the Fund during the Fund's fiscal year ended September 30, 2016.

Trustee Compensation

Effective May 23, 2016, the Independent Trustees each receive an annual retainer fee of \$87,000 per calendar year, which compensates them for their service to the Trust and attendance at the four regularly scheduled quarterly meetings and one annual meeting, if necessary. Prior to May 23, 2016, the annual retainer fee was \$69,000. Each Independent Trustee also receives added compensation for each additional meeting attended of \$1,500 for an in-person meeting and \$1,000 for a telephonic meeting, as well as reimbursement for expenses incurred in connection with attendance at meetings. The Chairman of the Audit Committee and the Valuation Committee each receive additional compensation of \$5,000 per year and the lead Independent Trustee receives additional compensation of \$6,000 per year. The Interested Trustee does not receive any compensation for his service as Trustee. The following table sets forth the compensation received by the Independent Trustees for the Fund's fiscal year ended September 30, 2016:

Name of Person/Position	Aggregate Compensation from the Fund ⁽¹⁾	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation from the Fund and the Trust ⁽²⁾ Paid to Trustees
Leonard M. Rush, Lead Independent Trustee and Audit Committee Chairman	\$2,789	None	None	\$82,500
Roel C. Campos, Independent Trustee ⁽³⁾	\$1,439	None	None	\$41,500
David A. Massart, Independent Trustee and Valuation Committee Chairman	\$2,585	None	None	\$76,500
David M. Swanson, Independent Trustee	\$2,416	None	None	\$71,500
Robert J. Kern, Interested Trustee	None	None	None	None

⁽¹⁾ Trustees fees and expenses are allocated among the Fund and any other series comprising the Trust.

⁽²⁾ The Trust includes other portfolios in addition to the Fund.

⁽³⁾ Mr. Campos resigned as an Independent Trustee effective February 22, 2016.

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for shareholder vote by the Fund. The following table lists the shareholders considered to be either a control person or a principal shareholder of the Fund as of December 31, 2016:

Name and Address	% Ownership	Type of Ownership ⁽¹⁾
Charles Schwab & Co., Inc. Attn Mutual Funds 211 Main St. San Francisco, CA 94105-1905	44.22%	Record
Merfarm & Co. C/O Merchants Trust Co. 275 Kennedy Drive S. Burlington, VT 05403-6785	5.42%	Record

⁽¹⁾ “Record” ownership means the shareholder of record, or the exact name of the shareholder on the account (e.g. “ABC Brokerage, Inc.”). “Beneficial” ownership refers to the actual pecuniary, or financial, interest in the security (e.g. “Jane Doe Shareholder”).

Investment Adviser

Investment advisory services are provided to the Fund by the Adviser, Cove Street Capital, LLC, pursuant to an investment advisory agreement (the “Advisory Agreement”). The Adviser is majority owned by Jeffrey Bronchick.

Pursuant to the Advisory Agreement, the Adviser provides the Fund with investment research and advice and furnishes the Fund with an investment program consistent with the Fund’s investment objective and policies, subject to the supervision of the Board. The Adviser determines which

portfolio securities will be purchased or sold, arranges for the placing of orders for the purchase or sale of portfolio securities, selects brokers or dealers to place those orders, maintains books and records with respect to the securities transactions, and reports to the Board on the Fund’s investments and performance. The Adviser is solely responsible for making investment decisions on behalf of the Fund. The Board will have sole responsibility for selecting, evaluating the performance of, and replacing as necessary any of the service providers to the Fund, including the Adviser.

The Advisory Agreement will continue in effect from year to year, only if such continuance is specifically approved at least annually by: (i) the Board or the vote of a majority of the outstanding voting securities of the Fund; and (ii) the vote of a majority of the Independent Trustees, cast in person at a meeting called for the purpose of voting on such approval. The Advisory Agreement is terminable without penalty by the Trust, on behalf of the Fund, upon 60 days’ written notice to the Adviser, when authorized by either: (i) a majority vote of the Fund’s shareholders (with respect to such Fund); or (ii) by a vote of a majority of the Board, or by the Adviser upon 60 days’ written notice to the Trust. The Advisory Agreement will automatically terminate in the event of its “assignment,” as defined under the 1940 Act. The Advisory Agreement provides that the Adviser under such agreement shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

In consideration of the services provided by the Adviser pursuant to the Advisory Agreement, the Adviser is entitled to receive from the Fund a management fee computed daily and paid monthly, based on a percentage of the Fund’s net assets, as specified in the Prospectus. However, the Adviser may voluntarily agree to reduce the management fees payable to it on a month-to-month basis, including additional fees above and beyond any contractual agreement the Adviser may have to reduce management fees and/or reimburse Fund expenses.

Fund Expenses. The Fund is responsible for its own operating expenses. Pursuant to an Operating Expenses Limitation Agreement between the Adviser and the Trust, on behalf of the Fund, the Adviser has agreed to waive all or a portion of its management fees and reimburse the Fund for its operating expenses, as specified in the Prospectus. Fees waived and expenses reimbursed by the Adviser may be recouped by the Adviser for a period of three fiscal years following the fiscal year during which such waiver and expense reimbursement was made, if such recoupment can be achieved without exceeding the expense limit in effect at the time the fee waiver and expense reimbursement occurred and at the time of the recoupment. The Operating Expenses Limitation Agreement is indefinite, but cannot be terminated through at least January 28, 2018. Thereafter, the agreement may be terminated at any time upon 60 days’ written notice by the Trust’s Board or the Adviser, with the consent of the Board.

The total amount of advisory fees paid by the Fund during the three preceding fiscal years ending September 30 are as follows:

	2016	2015	2014
Advisory Fees Accrued	\$504,039	\$413,602	\$473,682
Advisory Fees Recouped/(Waived)	\$(93,256)	\$(3,712)	\$25,489
Total Advisory Fees Paid to Adviser	\$410,783	\$409,890	\$499,171

Portfolio Manager

As disclosed in the Prospectus, Mr. Jeffrey Bronchick is the portfolio manager for the Fund (the “Portfolio Manager”).

The following table provides information regarding other accounts, excluding the Fund, managed by the Portfolio Manager as of September 30, 2016:

Registered Investment Companies		Other Pooled Investment Vehicles		Other Accounts	
Number of Accounts	Total Assets in the Accounts (in millions)	Number of Accounts	Total Assets in the Accounts (in millions)	Number of Accounts	Total Assets in the Accounts (in millions)
1	\$11.89	1	\$90.80	65	\$978.74

As of September 30, 2016, the Portfolio Manager managed one account pursuant to a performance-based advisory fee valued at \$100.8 million.

The Portfolio Manager’s management of “other accounts” may give rise to potential conflicts of interest in connection with the management of the Fund’s investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the Portfolio Manager could favor one account over another. Another potential conflict could include the Portfolio Manager’s knowledge about the size, timing, and possible market impact of Fund trades, whereby the Portfolio Manager could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

The Adviser compensates the Portfolio Manager for his management of the Fund. The Portfolio Manager’s compensation is based on a combination of competitive salary, a share in the Adviser’s bonus pool based on the profitability of the firm and individual performance, and a pro rata share of available corporate profits as a principal of the firm. Whereas the performance of an account may contribute to the overall profitability of the firm, compensation of the Portfolio Manager is not based on the numerical performance of any client account. The Portfolio Manager’s entire compensation package is paid by the Adviser and not by any client account.

As of September 30, 2016, the Portfolio Manager beneficially owned shares of the Fund valued over \$1,000,000.

Service Providers

Pursuant to an administration agreement (the “Administration Agreement”) between the Trust and U.S. Bancorp Fund Services, LLC (“USBFS”), 615 East Michigan Street, Milwaukee, Wisconsin, 53202, the Administrator acts as the Fund’s administrator. The Administrator provides certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparation for signature by an officer of the Trust of all documents required to be filed for compliance by the Trust and the Fund with applicable laws and regulations.; arranging for the computation of performance data, including NAV per share and yield; responding to shareholder inquiries; and arranging for the maintenance of books and records of the

Fund, and providing, at its own expense, office facilities, equipment and personnel necessary to carry out its duties. In this capacity, the Administrator does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. Pursuant to the Administration Agreement, for its services, the Administrator receives from the Fund a fee computed daily and payable monthly based on the Fund's average daily net assets, subject to an annual minimum fee. USBFS also acts as Fund Accountant, Transfer Agent and dividend disbursing agent under separate agreements with the Trust.

The Fund paid the following fund administration and fund accounting fees to USBFS during the fiscal years ended September 30:

2016	2015	2014
\$87,213	\$93,152	\$93,046

Pursuant to a custody agreement between the Trust and U.S. Bank, N.A. ("U.S. Bank"), an affiliate of USBFS, U.S. Bank serves as the custodian of the Fund's assets (the "Custodian"). For its services, the Custodian receives a monthly fee based on a percentage of the Fund's assets, in addition to certain transaction based fees, and is reimbursed for out-of-pocket expenses. The Custodian's address is 1555 North Rivercenter Drive, Milwaukee, Wisconsin, 53212. The Custodian does not participate in decisions relating to the purchase and sale of securities by the Fund. U.S. Bank and its affiliates may participate in revenue sharing arrangements with service providers of mutual funds in which the Fund may invest.

Legal Counsel

Stradley Ronon Stevens & Young, LLP, 2005 Market Street, Suite 2600, Philadelphia, PA 19103, serves as counsel to the Trust and as independent legal counsel to the Board.

Independent Registered Public Accounting Firm

Cohen & Company, Ltd., 1350 Euclid Avenue, Suite 800, Cleveland, Ohio 44115, serves as the independent registered public accounting firm for the Fund. Its services include auditing the Fund's financial statements and the performance of related tax services.

Distribution of Fund Shares

The Trust has entered into a distribution agreement (the "Distribution Agreement") with Quasar Distributors, LLC (the "Distributor"), 615 East Michigan Street, Milwaukee, Wisconsin 53202, pursuant to which the Distributor acts as the Fund's principal underwriter, provides certain administrative services and promotes and arranges for the sale of the Fund's shares on a best efforts basis. The offering of the Fund's shares is continuous. The Distributor, Administrator, Fund Accountant, and Custodian are affiliated companies. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA").

The Distribution Agreement will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and, in either case, by a majority of the Independent Trustees. The Distribution Agreement is terminable without penalty by the Trust, on behalf of the Fund, on 60 days' written notice when authorized either by a majority vote of the Fund's shareholders or by vote of a majority of the Board, including a majority of the Trustees who are not "interested persons" (as defined under the 1940 Act) of the Trust, or by the Distributor on 60 days' written notice, and will automatically terminate in the event of its "assignment," as defined in the 1940 Act.

Portfolio Transactions and Brokerage

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. Purchases and sales of securities on an exchange are affected through brokers that charge a commission while purchases and sales of securities in the over-the-counter market will generally be executed directly with the primary "market-maker" unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction. Purchases and sales of portfolio securities that are fixed income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from whom the Fund purchases or to whom the Fund sells is acting on its own behalf (and not as the agent of some other party, such as its customer). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflects the spread between the bid and asked price. The price of over-the-counter securities usually includes an undisclosed commission or markup.

Purchases of portfolio securities for the Fund will be effected through broker-dealers (including banks) that specialize in the types of securities that the Fund will be holding, unless better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities, and other factors available, will be considered in making these determinations. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser that it may lawfully and appropriately use in its investment advisory capacities, as well as provide other brokerage services incidental to execution services. Research and statistical information may include reports that are common in the industry such as industry research reports and periodicals, quotation systems, software for portfolio management and formal databases. Typically, the research will be used to service all of the Adviser's accounts, although a particular client may not benefit from all the research received on each occasion. The Adviser considers research information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Fund, to be useful in varying degrees, but of indeterminable value.

While it is the Fund's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Adviser, even if the specific services are not directly useful to the Fund and may be useful to the Adviser in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-

dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Fund.

Investment decisions for the Fund are made independently from those of other client accounts of the Adviser and its affiliates. Nevertheless, it is possible that at times identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund. Notwithstanding the above, the Adviser may execute buy and sell orders for accounts and take action in performance of its duties with respect to any of its accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practical, allocate investment opportunities to accounts, including the Fund, over a period of time on a fair and equitable basis and in accordance with applicable law.

Portfolio transactions may be placed with broker-dealers who sell shares of the Fund subject to rules adopted by FINRA and the SEC. Portfolio transactions may also be placed with broker-dealers in which the Adviser has invested on behalf of the Fund and/or client accounts.

The Fund paid the following brokerage commissions during the fiscal years ended September 30:

2016	2015	2014
\$150,704	\$116,307	\$106,746

Portfolio Turnover

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to above-average transaction costs and could generate capital gains that must be distributed to shareholders as short-term capital gains taxed at ordinary income rates (currently as high as 35%). To the extent that the Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Fund could be negatively impacted by the increased expenses incurred by the Fund and may result in a greater number of taxable transactions.

The Fund's portfolio turnover rate for the fiscal years ended September 30, were as follows:

2016	2015
85%	107%

Code of Ethics

The Trust, the Adviser and the Distributor have each adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, personnel of the Trust, Adviser, and Distributor to invest in securities that may be purchased or held by the Fund.

Proxy Voting Procedures

The Board has adopted proxy voting policies and procedures ("Proxy Policies") wherein the Trust has delegated to the Adviser the responsibility for voting proxies relating to portfolio securities held by the Fund as part of the Adviser's investment advisory services, subject to the supervision and oversight of the Board. Notwithstanding this delegation of responsibilities, however, the Fund retains the right to vote proxies relating to its portfolio securities. The fundamental purpose of the Proxy Policies is to ensure that each vote will be in a manner that reflects the best interest of the Fund and its shareholders, taking into account the value of the Fund's investments.

The actual voting records relating to portfolio securities during the most recent 12-month period ended June 30 are available without charge, upon request, by calling toll-free, (800) SEC-0330 or by accessing the SEC's website at www.sec.gov.

The Adviser's Proxy Voting Policies and Procedures

The Adviser will vote proxies on behalf of the Fund in a manner that it believes is consistent with the best interests of the Fund and its shareholders. Absent special circumstances, all proxies will be voted consistent with guidelines established and described in the Adviser's Proxy Voting Policies and Procedures. A summary of the Adviser's Proxy Voting Policies and Procedures is as follows:

- The Adviser generally votes against issues that seek to entrench a board and management of a company through anti-takeover measures, staggered board terms, super majority requirements and poison pill provisions;
- The Adviser is highly sensitive to any measures that potentially may dilute shareholder interests (i.e., new issues or excessive management compensation through equity gifting);
- The Adviser will not vote shares in favor of social issues unless it believes it will advance shareholder value; and
- The Adviser generally votes in favor of measures that provide shareholders with greater ability to nominate directors, hold directors and management accountable for performance, and allow shareholders to directly vote on takeover proposals by third parties.

Anti-Money Laundering Compliance Program

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. Ms. Deborah Ward has been designated as the Trust's Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to: determining that the Distributor and the Transfer Agent have established proper anti-money laundering procedures; reporting suspicious and/or fraudulent activity; and a complete and thorough review of all new account applications. The Fund will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Fund may be required to “freeze” the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Fund may be required to transfer the account or proceeds of the account to a governmental agency.

Portfolio Holdings Information

The Trust, on behalf of the Fund, has adopted portfolio holdings disclosure policies (“Portfolio Holdings Policies”) that govern the timing and circumstances of disclosure of portfolio holdings of the Fund. Information about the Fund’s portfolio holdings will not be distributed to any third party except in accordance with these Portfolio Holdings Policies. The Board has considered the circumstances under which the Fund’s portfolio holdings may be disclosed under the Portfolio Holdings Policies. The Board has also considered actual and potential material conflicts that could arise in such circumstances between the interests of the Fund’s shareholders and the interests of the Adviser, Distributor, or any other affiliated person of the Fund. After due consideration, the Board has determined that the Fund has a legitimate business purpose for disclosing portfolio holdings to persons described in the Portfolio Holdings Policies. The Board also authorized its CCO to consider and authorize dissemination of portfolio holdings information to additional parties, after considering the best interests of the Fund’s shareholders and potential conflicts of interest in making such disclosures.

The Board exercises continuing oversight of the disclosure of the Fund’s portfolio holdings by (1) overseeing the implementation and enforcement of the Portfolio Holdings Policies, codes of ethics and other relevant policies of the Fund and its service providers by the CCO, (2) by considering reports and recommendations by the CCO concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act), and (3) by considering whether to approve any amendment to these Portfolio Holdings Policies. The Board reserves the right to amend the Portfolio Holdings Policies at any time without prior notice in its sole discretion.

Disclosure of the Fund’s complete holdings is required to be made quarterly within 60 days of the end of each fiscal quarter, in the annual and semi-annual reports to Fund shareholders, and in the quarterly holdings report on Form N-Q. These reports will be made available, free of charge, on the EDGAR database on the SEC’s website at www.sec.gov. The Fund also discloses its top ten portfolio holdings and sector allocation on the Fund’s website at www.covestreetfunds.com within approximately 10 calendar days after each quarter end. The Fund’s holdings will remain posted on the website until next updated with the following month’s holdings. The Fund may provide separately to any person, including rating and ranking organizations such as Lipper and Morningstar, the Fund’s holdings commencing the day after the information is first published on the Fund’s website. In addition, the Fund may provide its complete portfolio holdings at the same time that it is filed with the SEC.

In the event of a conflict between the interests of the Fund and its shareholders and the interests of the Adviser or an affiliated person of the Adviser, the CCO of the Adviser, in consultation with the Trust’s CCO, shall make a determination in the best interests of the Fund and its shareholders, and shall report such determination to the Board at the end of the quarter in which such determination was

made. Any employee of the Adviser who suspects a breach of this obligation must report the matter immediately to the Adviser's CCO or to his or her supervisor.

In addition, material non-public holdings information may be provided without lag as part of the normal investment activities of the Fund to each of the following entities which, by explicit agreement or by virtue of their respective duties to the Fund, are required to maintain the confidentiality of the information disclosed: the Administrator; the Fund Accountant; the Custodian; the Transfer Agent; the Fund's independent registered public accounting firm; counsel to the Fund or the Board (current parties are identified in this SAI); broker-dealers (in connection with the purchase or sale of securities or requests for price quotations or bids on one or more securities); and regulatory authorities. Portfolio holdings information not publicly available with the SEC or on the Fund's web site may only be provided to additional third parties, in accordance with the Portfolio Holdings Policies, when the Fund has a legitimate business purpose, and the third party recipient is subject to a confidentiality agreement. Such portfolio holdings disclosure must be approved under the Portfolio Holdings Policies by the Trust's CCO.

In no event shall the Adviser, its affiliates or employees, or the Fund receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

There can be no assurance that the Portfolio Holdings Policies and these procedures will protect the Fund from potential misuse of Fund information by individuals or entities to which it is disclosed.

Determination of Net Asset Value

The NAV of the Fund's shares will fluctuate and is determined by the Fund Accountant as of the close of trading on the New York Stock Exchange (the "NYSE") (generally 4:00 p.m., Eastern time) each business day. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that it will not be open on the following days: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV per share is computed by determining the Fund's "Net Assets" and dividing by the total number of shares outstanding at such time. Net Assets are calculated by (1) taking the value of all assets, less liabilities, held by the Fund; and (2) subtracting "Accrued Expenses."

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{Net Asset Value}$$

The Fund's assets are generally valued at their market price on the valuation date and are based on valuations provided by independent pricing services consistent with the Trust's valuation procedures. When market prices are not readily available, a security or other asset is valued at its fair value as determined under fair value pricing procedures approved by the Board.

Each security owned by the Fund that is listed on a securities exchange is valued at its last sale price on that exchange on the date as of which assets are valued. Where the security is listed on more than one exchange, the Fund will use the price of the exchange that the Fund generally considers to be the principal exchange on which the security is traded. If no sale is reported, the security is valued at the mean between the last available bid and asked price.

Portfolio securities primarily traded on the NASDAQ Stock Market (“NASDAQ”) shall be valued using the NASDAQ Official Closing Price (“NOCP”) which may not necessarily represent the last sale price. If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has been no sale on such day, at the mean between the bid and asked prices. OTC securities that are not traded on NASDAQ shall be valued at the most recent trade price.

Fixed income securities are valued at the mean of the bid and asked prices as determined by an independent pricing service, taking into consideration recent transactions, yield, liquidity, risk, credit quality, coupon, maturity, type of issue and any other factors or market data the pricing service deems relevant. Participation notes are valued at the mean between bid and ask prices.

Foreign securities are valued in the same manner as the securities described above. Foreign securities are priced in the local currencies as of the close of their primary exchange or market or as of the close of trading on the NYSE, whichever is earlier. Foreign currencies are translated into U.S. dollars at the exchange rate as provided by a pricing service as of the close of trading on the NYSE.

Exchange traded options are valued at the composite price, using the National Best Bid and Offer quotes (“NBBO”). NBBO consists of the highest bid price and lowest ask price across any of the exchanges on which an option is quoted, thus providing a view across the entire U.S. options marketplace. Specifically, composite pricing looks at the last trades on the exchanges where the options are traded. If there are no trades for the option on a given business day composite option pricing calculates the mean of the highest bid price and lowest ask price across the exchanges where the option is traded.

All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect their fair value.

Purchase and Redemption of Fund Shares

Shares of the Fund are sold in a continuous offering and shares may be purchased or redeemed on any business day that the Fund calculates its NAV. The Fund may also authorize one or more financial intermediaries to accept purchase and redemption orders on its behalf (“Authorized Intermediaries”). Authorized Intermediaries are authorized to designate other Authorized Intermediaries to accept orders on the Fund’s behalf. An order is deemed to be received when the Fund or an Authorized Intermediary accepts the order.

Orders received by the Fund or an Authorized Intermediary by the close of trading on the NYSE (generally 4:00 p.m., Eastern time) on a business day will be effected at the applicable price per share determined as of the close of trading on the NYSE on that day. Otherwise, the orders will be processed based on the next determined NAV.

Orders received by financial intermediaries that are not Authorized Intermediaries will be processed at the applicable price next calculated after the Transfer Agent receives the order from the financial intermediary

Purchase Requests Must be Received in Good Order

“Good order” means that your purchase request includes:

- The name of the Fund;
- The dollar amount of shares to be purchased;
- Your account application or investment stub; and
- A check or wire transfer payable to the name of the Fund.

Shares of the Fund have not been registered and are not offered for sale outside of the United States. The Fund generally does not sell shares to investors residing outside the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses or in certain other circumstances where the CCO and Anti-Money Laundering Officer for the Trust conclude that such sale is appropriate and is not in contravention of United States law.

Redemption Requests Must be Received in Good Order

Your share price will be based on the next NAV per share calculated after the Transfer Agent or an Authorized Intermediary receives your redemption request in good order. A redemption request will be deemed in “good order” if it includes:

- The shareholder’s name;
- The name of the Fund;
- The account number;
- The share or dollar amount to be redeemed; and
- Signatures by all shareholders on the account (with signature(s) guaranteed, if applicable).

Unless you instruct the Transfer Agent otherwise, redemption proceeds will be sent to the address of record. The Fund will not be responsible for interest lost on redemption amounts due to lost or misdirected mail.

A signature guarantee of each owner is required in the following situations:

- If ownership is changed on your account;
- When redemption proceeds are payable or sent to any person, address or bank account not on record;
- If a change of address request was received by the Transfer Agent within the last 15 calendar days; or
- For all redemptions in excess of \$100,000 from any shareholder account.

Non-financial transactions, including establishing or modifying certain services on an account, may require a signature guarantee, signature verification from a Signature Validation Program member, or other acceptable form of authentication from a financial institution source. Signature guarantees, from either a Medallion program member or a non-Medallion program member, can be obtained from banks and securities dealers, but not from a notary public.

The Fund may elect in the future to limit eligible signature guarantors to institutions that are members of a signature guarantee program. The Fund and the Transfer Agent reserve the right to amend these standards at any time without notice.

The Fund's Right to Redeem an Account. The Fund reserves the right to redeem the shares of any shareholder whose account balance is less than \$2,500, other than as a result of a decline in the NAV of the Fund. For shareholders whose Investor Class shares were converted on November 25, 2015, the Fund reserves the right to redeem the shares of any shareholder whose account balance is less than \$250. The Fund will provide a shareholder with written notice 30 days prior to redeeming the shareholder's account.

Redemption-in-Kind

Under normal circumstances, the Fund does not intend to redeem shares in any form except cash. The Trust, however, has filed a notice of election under Rule 18f-1 of the 1940 Act that allows the Fund to redeem in-kind redemption requests during any 90-day period in excess of the lesser of \$250,000 or 1% of the net assets of the Fund, valued at the beginning of such period. If the Fund pays your redemption proceeds by a distribution of securities, you could incur brokerage or other charges in converting the securities to cash, and will bear any market risks associated with such securities until they are converted into cash.

Cancellations and Modifications

The Fund will not accept a request to cancel or modify a transaction once processing has begun.

Tax Matters

The following discussion is a summary of certain U.S. federal income tax considerations affecting the Fund and its shareholders. The discussion reflects applicable U.S. federal income tax laws of the U.S. as of the date of this SAI, which tax laws may be changed or subject to new interpretations by the courts or the Internal Revenue Service (the "IRS"), possibly with retroactive effect. No attempt is made to present a detailed explanation of all U.S. federal income, estate or gift, or state, local or foreign tax concerns affecting the Fund and their shareholders (including shareholders owning large positions in the Fund). The discussion set forth herein does not constitute tax advice. Investors are urged to consult their own tax advisers to determine the tax consequences to them of investing in the Fund.

Each series of the Trust is treated as a separate entity for federal income tax purposes. The Fund, a series of the Trust, intends to qualify and elect to be treated as a regulated investment company ("RIC") under Subchapter M of the Code, provided it complies with all applicable requirements regarding the source of its income, diversification of its assets and timing of distributions.

If for any taxable year the Fund fails to qualify for the special federal income tax treatment afforded to RICs, all of its taxable income will be subject to federal income tax at regular corporate rates (without any deduction for distributions to the Fund's shareholders) and its income available for distribution will be reduced.

As long as the Fund meets certain requirements that govern the Fund's source of income, diversification of assets and distribution of earnings to shareholders, the Fund will not be subject to U.S. federal income tax on income distributed (or treated as distributed, as described below) to its shareholders. With respect to the source of income requirement, the Fund must derive in each taxable year at least 90% of its gross income (including tax-exempt interest) from (i) dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such shares, securities or currencies and (ii) net income derived from interests in qualified publicly traded partnerships ("QPTP"). A QPTP is generally defined as a publicly traded partnership under Section

7704 of the Code, but does not include a publicly traded partnership if 90% or more of its income is described in (i) above.

With respect to the diversification of assets requirement, the Fund must diversify its holdings so that, at the end of each quarter of each taxable year, (i) at least 50% of the value of the Fund's total assets is represented by cash and cash items, U.S. government securities, the securities of other RICs and other securities, with such other securities limited for purposes of such calculation, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and not more than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of the Fund's total assets is invested in the securities of any one issuer (other than U.S. government securities or the securities of other RICs), the securities (other than the securities of other RICs) of any two or more issuers that the Fund control and that are determined to be engaged in the same, similar or related trades or businesses, or the securities of one or more QPTPs.

The Fund's policy is to distribute to its shareholders substantially all of its net investment company taxable income and any net realized long-term capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes based on net income. However, the Fund can give no assurances that its anticipated distributions will be sufficient to eliminate all taxes. If the Fund does not qualify as a regulated investment company, it would be taxed as a corporation and, in such case, it would be more beneficial for a shareholder to directly own the Fund's underlying investments rather than indirectly owning the underlying investments through the Fund. If the Fund fails to distribute (or be deemed to have distributed) by December 31 of each calendar year (i) at least 98% of its ordinary income for such year, (ii) at least 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax, the Fund will be subject to a 4% excise tax.

Net investment income generally consists of interest, dividends, and short-term capital gains, less expenses. Net realized capital gains for a fiscal period are computed by taking into account any capital loss carryforward of the Fund.

Distributions of net investment income are taxable to shareholders as ordinary income. For individual shareholders, a portion of the distributions paid by the Fund may consist of qualified dividends eligible for taxation at the rate applicable to long-term capital gains to the extent the Fund designates the amount distributed as a qualified dividend and the shareholder meets certain holding period requirements with respect to his or her Fund shares. In the case of corporate shareholders, a portion of the distributions may qualify for the intercorporate dividends-received deduction to the extent the Fund designates the amount distributed as eligible for deduction and the shareholder meets certain holding period requirements with respect to its Fund shares. The aggregate amount so designated to either individuals or corporate shareholders cannot, however, exceed the aggregate amount of such dividends received by the Fund for its taxable year. In view of the Fund's investment policies, it is expected that part of the distributions by the Fund may be eligible for the qualified dividend income treatment for individual shareholders and the dividends-received deduction for corporate shareholders.

Any long-term capital gain distributions are taxable to shareholders as long-term capital gains regardless of the length of time shares have been held. Net capital gains distributions are not eligible for the qualified dividend income treatment or the dividends-received deduction referred to in the previous paragraph.

Any distributions to you in excess of the Fund's investment company taxable income and net capital gains will be treated by you, first, as a tax-deferred return of capital, which is applied against and will reduce the adjusted tax basis of your shares and, after such adjusted tax basis is reduced to zero, will generally constitute capital gains.

Distributions of any net investment income and net realized capital gains will be taxable as described above, whether received in shares or in cash. Shareholders who choose to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date. Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable as if received on December 31. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the alternative minimum tax.

Investment income received by the Fund from sources within foreign countries may be subject to foreign income tax withheld at the source and the amount of tax withheld generally will be treated as an expense of the Fund. The U.S. has entered into tax treaties with many foreign countries that entitle the Fund to a reduced rate of, or exemption from, tax on such income. Some countries require the filing of a tax reclaim or other forms to receive the benefit of the reduced tax rate; whether or when the Fund will receive the tax reclaim is within the control of the individual country. Information required on these forms may not be available such as shareholder information; therefore, the Fund may not receive the reduced treaty rates or potential reclaims. Other countries have conflicting and changing instructions and restrictive timing requirements which may cause the Fund not to receive the reduced treaty rates or potential reclaims. Other countries may subject capital gains realized by the Fund on sale or disposition of securities of that country to taxation. It is impossible to determine the effective rate of foreign tax in advance since the amount of the Fund's assets to be invested in various countries is not known.

A redemption of Fund shares may result in recognition of a taxable gain or loss and, if held as a capital asset, capital gain or loss. Any loss realized upon a redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains received on those shares. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the Fund are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

The Fund is required to report to you and the IRS annually on Form 1099-B the cost basis of shares purchased or acquired. However, cost basis reporting is not required for certain shareholders, including shareholders investing in the Fund through a tax-advantaged retirement account, such as a 401(k) plan or an individual retirement account. The Fund will calculate cost basis using the Fund's default method, unless you instruct the Fund to use a different calculation method. For additional information regarding the Fund's available cost basis reporting methods, including its default method, please contact the Fund. If you hold your Fund shares through a broker (or other nominee), please contact that broker (nominee) with respect to reporting of cost basis and available elections for your account.

Except in the case of certain exempt shareholders, if a shareholder does not furnish the Fund with its correct Taxpayer Identification Number and certain certifications or the Fund receives notification from the Internal Revenue Service requiring back-up withholding, the Fund is required by federal law to withhold federal income tax from the shareholder's distributions and redemption proceeds currently at a rate of 28% for U.S. residents.

Gain or loss recognized by the Fund on the sale or other disposition of portfolio investments will be a capital gain or loss. Such capital gain and loss may be long-term or short-term depending, in general, upon the length of time a particular investment position is maintained and, in some cases, upon the nature of the transaction. Property held for more than one year generally will be eligible for long-term capital gain or loss treatment. The application of certain rules described below may serve to alter the manner in which the holding period for a security is determined or may otherwise affect the characterization as long-term or short-term, and also the timing of the realization and/or character, of certain gains or losses.

The Fund's transactions in foreign currencies, foreign currency-denominated debt obligations and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned. This treatment could increase or decrease the Fund's ordinary income distributions to you, and may cause some or all of the Fund's previously distributed income to be classified as a return of capital. In certain cases, the Fund may make an election to treat such gain or loss as capital.

The Fund may invest in securities of foreign companies that may be classified under the Internal Revenue Code as PFICs. In general, a foreign company is classified as a PFIC if at least one-half of its assets constitute investment-type assets or 75% or more of its gross income is investment-type income. When investing in PFIC securities, the Fund intends to mark-to-market these securities under certain provisions of the Internal Revenue Code and recognize any unrealized gains as ordinary income at the end of the Fund's fiscal and excise tax years. Deductions for losses are allowable only to the extent of any current or previously recognized gains. These gains (reduced by allowable losses) are treated as ordinary income that the Fund is required to distribute, even though it has not sold or received dividends from these securities. You should also be aware that the designation of a foreign security as a PFIC security will cause its income dividends to fall outside of the definition of qualified foreign corporation dividends. These dividends generally will not qualify for the reduced rate of taxation on qualified dividends when distributed to you by the Fund. Foreign companies are not required to identify themselves as PFICs. Due to various complexities in identifying PFICs, the Fund can give no assurances that it will be able to identify portfolio securities in foreign corporations that are PFICs in time for the Fund to make a mark-to-market election. If the Fund is unable to identify an investment as a PFIC and thus does not make a mark-to-market election, the Fund may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend by the Fund to its shareholders. Additional charges in the nature of interest may be imposed on the Fund in respect of deferred taxes arising from such distributions or gains.

Foreign taxpayers (including nonresident aliens) are generally subject to a flat withholding rate, currently 30% on U.S. source income. This withholding rate may be lower under the terms of a tax convention.

This discussion and the related discussion in the Prospectus have been prepared by Fund management, and counsel to the Fund has expressed no opinion in respect thereof.

This section is not intended to be a full discussion of federal tax laws and the effect of such laws on you. There may be other federal, state, foreign or local tax considerations to a particular investor. You are urged to consult your own tax advisor.

Distributions

The Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund's net investment income, substantially all of which will be distributed to the Fund's shareholders.

The amount of the Fund's distributions is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed, and is subject to the discretion of the Board. The Fund does not pay "interest" or guarantee any fixed rate of return on an investment in its shares.

The Fund may also derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain the Fund may realize from transactions involving investments held less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any carryover of capital losses from the eight previous taxable years), although a distribution from capital gains, will be distributed to shareholders with and as a part of the distributions of net investment income giving rise to ordinary income. If during any year the Fund realizes a net gain on transactions involving investments held for the period required for long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses carried over from the eight previous taxable years) will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax advisor.

Any distribution paid by the Fund reduces that Fund's NAV per share on the date paid by the amount of the distribution per share. Accordingly, a distribution paid shortly after a purchase of shares by a shareholder would represent, in substance, a partial return of capital (to the extent it is paid on the shares so purchased), even though it would be subject to income taxes.

Distributions will be made in the form of additional shares of the Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of distributions by notifying the Transfer Agent in writing. However, any such change will be effective only as to distributions for which the record date is five or more business days after the Transfer Agent has received the written request.

Financial Statements

The Fund's annual report to shareholders for the fiscal year ended September 30, 2016 is a separate document, and the financial statements, accompanying notes, and report of the independent registered public accounting firm appearing therein are incorporated by reference into this SAI.
